## Dekan Mesajı

Segili Öğrenciler,

Tıp öğreniminin 4. yılına başladığımız bu yılın özelliği; klinik öğrenimin (staj eğitimi) başlamasıdır. Fakültede ilk iki yılda kazandığımız teorik bilgiler ve pratik deneyimler bu yıl size verilecek dersleri daha kolay anlamanızı ve pratikte kullanmanızı sağlayacaktır. Derslerinize yeterli ilgi ve özeni gösterin, özellikle ilk defa karşılaşacağınız konuları ayrıntılı olarak anlatan kitaplardan öğrenmeye çalışın. Derslere ve uygulamalara devam etmek ve gördüğünüz konuları vakit geçirmeden kaynak kitaplardan da okuyarak bilginizi sağlamlaştırmak başarınızı çok yükseltecektir. Bu yıl ayrıca, sizlere hafatanın iki günü kampüste “Genel Tekrar Dersleri” adı altında temel bilimlerin bilgilerinin tekrarlanacağı ve böylece pekiştirmesi amaçlanan bir ders konulmuştur. Bu derse mutlaka devam etmeniz ve gördüğünüz konuları tekrar etmeniz 6. sınıf sonunda gireceğiniz Tıp’ta Uzmanlık Sınavı açısından size çok yararlı olacaktır. Yeditepe Üniversitesi Tıp Fakültesini sizlerin de katkısıyla diğer tıp fakülteleri arasında daha ileriye taşıyacağımıza inanıyorum. 2007-2008 Akademik yılında başarılar diliyorum.

## GENERAL INFORMATION

The Combined Review Courses of Basic Science Project is a special project that is arranged for Yeditepe University Faculty of Medicine students' of Phase IV. This project is also the first and the unique project in Turkey.

As every faculty, Yeditepe University management desires to carry their success chart to upper levels in Medical Specialition Exam( MSE).

The medicine education is a 6-year period which is really a high cost and intensive education so the educationalist want to see the response of their effort also in the specialization exam and we believe that the first step of this long way begins in the 4th year of the education.

The management and educationalist staff of Yeditepe University who use all their physical possibilities in order to train successful doctors for the health sector have arranged this courses with the cooperation of TUMER Counseling, for the achievement of their students in the exam after they graduate.

The Combined Review Courses of Basic Science will be undertaken by TUMER. TUMER is a counseling company which trains and mentors the doctors till 1997 so they will transfer all their experiences for the students in their 4th year of Yeditepe for their accomplishment.

In the one-year period courses, information and evaluation seminars, repetition lessons, pop-quizes, essays, last review courses will be practiced entirely together with the guidance services. It will be a beginning preperation before the 5th and the 6th years. The project will be maintain in the 5th and in the 6th years as well.

Evaluation results and education reports will be shared with the management and positive and negative goings-on will be observed for continuity of the advice trade.

## AIMS

The goal is to repeat the whole knowledge especially basic sciences including Pathology, Histology, Physiology, Pharmacology, Biochemistry, Microbiology and Anatomy that is expounded in 4 years period, to increase the skill of approach to exam questions and to supply the motivation in the preperation time and preperation of the last 2 years.

The courses will be in a combination system for students to combine and diagnose their whole knowledge in a logical frame.

It will be possible for the students to identify and recognize this examination, to learn to study effectively and to increase the ability of using their knowledge with the help of these courses called "The Combined Review Courses of Basic Science".

## TARGETS

The success in the ( MSE) of Yeditepe University is nearly 5% until 2005. But after especially after the support of these courses, the success had increased to 25%. Now the target is, of course, to carry this average to upper levels.

Before 2006, this support of counseling was only for the interns but now the study of extending the courses for the 4th and the 5th year students had come true. As in the last 2 years, the courses will be for all the 4th, 5th and the 6th year students.

## **EDUCATION SCHEDULE AND ITS FORM**

In October there will be 2 different seminars called “( MSE) Information” and “The Techniques and Methodology of Studying ( MSE)”. After the seminars, the publication set will be hand out to students. But before these, on the September 2007, especially the new interns will take the original September ( MSE) exam to realize the real knowledge levels according to computer supported results.

After April 2008 ( MSE) there will be an evaluation seminar and in the end, before September 2008 the last seminar will be applied called “Examination Tactics”.

The programme includes nearly 250 hours time lectures, examinations and guidance and counseling services.

In the education period, there will be 11 ( MSE) Examinations including 2 original ( MSE) exams (2007 September & 2008 April). All analysis of the exam results will be evaluated by computer.

There will be attendance obligation for students and follow up charts will be prepared and presented to management.

The lessons are organised approximately 8 hours in 2 days (Tuesday and Thursday) for a week for the 4th classes. Curriculum papers will be for 15 days periods.
