OTORHINOLARYNGOLOGY & HEAD AND NECK SURGERY TRAINING PROGRAM

(3 weeks)

YEDİTEPE UNIVERSITY HOSPITAL

Head of the Department of Otorhinolaryngology: Yavuz Selim Pata, MD Prof.

İlhan Topaloğlu, MD Prof. Müzeyyen Doğan, MD Assoc. Prof. Zeynep Alkan, MD Assoc. Prof. Sevtap Akbulut, MD Assoc. Prof.

Rasim Yılmazer, MD Assist. Prof

Ömer Faruk Birkent (Audiologist)

Alm of this clerkship is to; 1. convey necessary knowledge on historical development of otorhinolaryngology, current and future applications of diagnostic and treatment methods, 2. convey necessary knowledge on clinical conditions related to otorhinolaryngology (head and neck oncology, rhinology, laryngology, otology, facial plastic and reconstructive surgery, voice and speech disorders, neuro-otology, audiology and hearing sciences, vestibular system, congenital and genetic diseases, head and neck cancers, allergic and immunologic diseases), 3. equip students with knowledge, skills and attitudes required to manage clinical conditions related to otorhinolaryngology at primary care setting At the end of this term, student should be able to: 1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4 distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diseases related to adenoid and tonsillary tissue 9. describe diseases related to adenoid and tonsillary tissue 9. describe diseases related to adenoid and tonsillary tissue 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level		OTORHINOLARYNGOLOGY				
1. convey necessary knowledge on historical development of otorhinolaryngology, current and future applications of diagnostic and treatment methods, 2. convey necessary knowledge on clinical conditions related to otorhinolaryngology (head and neck oncology, rhinology, laryngology, otology, facial plastic and reconstructive surgery, voice and speech disorders, neuro-otology, audiology and hearing sciences, vestibular system, congenital and genetic diseases, head and neck cancers, allergic and immunologic diseases), 3. equip students with knowledge, skills and attitudes required to manage clinical conditions related to otorhinolaryngology at primary care setting At the end of this term, student should be able to: 1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level	CLERKSHIP					
otorhinolaryngology, current and future applications of diagnostic and treatment methods, 2. convey necessary knowledge on clinical conditions related to otorhinolaryngology (head and neck oncology, rhinology, laryngology, otology, facial plastic and reconstructive surgery, voice and speech disorders, neuro-otology, audiology and hearing sciences, vestibular system, congenital and genetic diseases, head and neck cancers, allergic and immunologic diseases), 3. equip students with knowledge, skills and attitudes required to manage clinical conditions related to otorhinolaryngology at primary care setting At the end of this term, student should be able to: 1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diseases related to adenoid and tonsillary tissue 9. describe diseases related to adenoid and tonsillary tissue 9. describe diseases related to adenoid and tonsillary tissue 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology						
treatment methods, 2. convey necessary knowledge on clinical conditions related to otorhinolaryngology (head and neck oncology, rhinology, laryngology, otology, facial plastic and reconstructive surgery, voice and speech disorders, neuro-otology, audiology and hearing sciences, vestibular system, congenital and genetic diseases, head and neck cancers, allergic and immunologic diseases), 3. equip students with knowledge, skills and attitudes required to manage clinical conditions related to otorhinolaryngology at primary care setting At the end of this term, student should be able to: 1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level						
2. convey necessary knowledge on clinical conditions related to otorhinolaryngology (head and neck oncology, rhinology, laryngology, otology, facial plastic and reconstructive surgery, voice and speech disorders, neuro-otology, audiology and hearing sciences, vestibular system, congenital and genetic diseases, head and neck cancers, allergic and immunologic diseases), 3. equip students with knowledge, skills and attitudes required to manage clinical conditions related to otorhinolaryngology at primary care setting At the end of this term, student should be able to: 1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of femporomandibular joint diseases 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level						
AIM all distringuish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diseases 6. describe diseases 7. explain interventions to otorhinolaryngological emergencies 8. describe diagnosis and treatment of salivary gland diseases 9. describe diagnosis and medical treatment of salivary gland diseases 10. explain basics of temporomandibular joint diseases 11. describe external middle and malign laryngeal diseases 12. explain tabsics of incread and malign laryngeal diseases 13. explain basics of incread and malign tumors at basic level in oropharyngeal diseases 14. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 15. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 16. describe diagnosis and medical treatment of paranasal sinus diseases 17. explain interventions to otorhinolarnygological emergencies 18. describe diseases related to adenoid and tonsillary tissue 19. describe diagnosis and treatment of salivary gland diseases 10. explain basics of temporomandibular joint diseases 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level		,

allergic and immunologic diseases), 3. equip students with knowledge, skills and attitudes required to manage clinical conditions related to otorhinolaryngology at primary care setting At the end of this term, student should be able to: 1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level		disorders, neuro-otology, audiology and hearing sciences, vestibular				
allergic and immunologic diseases), 3. equip students with knowledge, skills and attitudes required to manage clinical conditions related to otorhinolaryngology at primary care setting At the end of this term, student should be able to: 1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level	AIM	system, congenital and genetic diseases, head and neck cancers,				
At the end of this term, student should be able to: 1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level	Allvi					
At the end of this term, student should be able to: 1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level						
1. describe external, middle and inner ear diseases 2. explain tinnitus, hearing loss and balance problems 3. explain basics of inner and external implant application and purpose 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level		clinical conditions related to otorhinolaryngology at primary care setting				
 explain tinnitus, hearing loss and balance problems explain basics of inner and external implant application and purpose distinguish between benign and malign tumors at basic level in oropharyngeal diseases distinguish between benign and malign tumors at basic level in nasopharyngeal diseases describe diagnosis and medical treatment of paranasal sinus diseases explain interventions to otorhinolarnygological emergencies describe diseases related to adenoid and tonsillary tissue describe diagnosis and treatment of salivary gland diseases explain assessment of laryngeal diseases at basic level distinguish between benign and malign laryngeal diseases explain basics of temporomandibular joint diseases explain basics of maxillofacial traumas and ortognatic surgery outline basics of genetic disorders related to otorhinolaryngology describe interpretation of audiological and early screening tests at basic level 						
 explain basics of inner and external implant application and purpose distinguish between benign and malign tumors at basic level in oropharyngeal diseases distinguish between benign and malign tumors at basic level in nasopharyngeal diseases describe diagnosis and medical treatment of paranasal sinus diseases explain interventions to otorhinolarnygological emergencies describe diseases related to adenoid and tonsillary tissue describe diagnosis and treatment of salivary gland diseases explain assessment of laryngeal diseases at basic level distinguish between benign and malign laryngeal diseases explain basics of temporomandibular joint diseases explain basics of maxillofacial traumas and ortognatic surgery outline basics of genetic disorders related to otorhinolaryngology describe interpretation of audiological and early screening tests at basic level 						
 4. distinguish between benign and malign tumors at basic level in oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level 						
oropharyngeal diseases 5. distinguish between benign and malign tumors at basic level in nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level						
 distinguish between benign and malign tumors at basic level in nasopharyngeal diseases describe diagnosis and medical treatment of paranasal sinus diseases explain interventions to otorhinolarnygological emergencies describe diseases related to adenoid and tonsillary tissue describe diagnosis and treatment of salivary gland diseases explain assessment of laryngeal diseases at basic level distinguish between benign and malign laryngeal diseases explain basics of temporomandibular joint diseases explain basics of maxillofacial traumas and ortognatic surgery outline basics of genetic disorders related to otorhinolaryngology describe interpretation of audiological and early screening tests at basic level 						
nasopharyngeal diseases 6. describe diagnosis and medical treatment of paranasal sinus diseases 7. explain interventions to otorhinolarnygological emergencies 8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level						
 describe diagnosis and medical treatment of paranasal sinus diseases explain interventions to otorhinolarnygological emergencies describe diseases related to adenoid and tonsillary tissue describe diagnosis and treatment of salivary gland diseases explain assessment of laryngeal diseases at basic level distinguish between benign and malign laryngeal diseases explain basics of temporomandibular joint diseases explain basics of maxillofacial traumas and ortognatic surgery outline basics of genetic disorders related to otorhinolaryngology describe interpretation of audiological and early screening tests at basic level 						
 explain interventions to otorhinolarnygological emergencies describe diseases related to adenoid and tonsillary tissue describe diagnosis and treatment of salivary gland diseases explain assessment of laryngeal diseases at basic level distinguish between benign and malign laryngeal diseases explain basics of temporomandibular joint diseases explain basics of maxillofacial traumas and ortognatic surgery outline basics of genetic disorders related to otorhinolaryngology describe interpretation of audiological and early screening tests at basic level 						
8. describe diseases related to adenoid and tonsillary tissue 9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level						
9. describe diagnosis and treatment of salivary gland diseases 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level						
 10. explain assessment of laryngeal diseases at basic level 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level 		•				
 11. distinguish between benign and malign laryngeal diseases 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level 		5				
 12. explain basics of temporomandibular joint diseases 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level 						
 13. explain basics of maxillofacial traumas and ortognatic surgery 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level 						
 14. outline basics of genetic disorders related to otorhinolaryngology 15. describe interpretation of audiological and early screening tests at basic level 						
15. describe interpretation of audiological and early screening tests at basic level						
basic level						
AO desembles and the second of		basic level 16. describe acustic and psychoacustic assessments				
17. outline diseases related to smelling and tasting						
18. describe stomatological diseases						
19. explain basics of conventional hearing devices and their indications for use		,				
20. describe basics and medical treatment of laryngopharyngeal reflux		20. describe basics and medical treatment of laryngopharyngeal reflux				

	21. describe sleep apnea and snoring problem and surgical treatment of those diseases
	22. describe swallowing disorders
	23. <i>tell</i> surgical techniques of incision in tracheostomy, tracheotomy, coniotomy
	24. describe voice and speech disorders and treatments of those diseases
	25. <i>tell</i> basics of head-neck tumors and skull base diseases
	26. <i>make</i> rhinolaryngological examination
SKILLS	27. use laryngoscope and otoscope
	28. design medical treatments in ear, nose and throat infections
	29.1. <i>do</i> diagnosis of ear, nose and throat diseases,
COMPETENCIES	29.2. <i>transfer</i> patient to specialized center upon indication
	30.1. <i>prepare</i> nasal packages,
	30.2. <i>remove</i> foreign body from ear and nose in emergency situations

ASSESSMENT TABLE

This table shows question types and assessment methods/tools used in training program.

Questions Types (Pencil-Paper Tests)	Proportion (in Pencil-Paper Tests)
Multiple Choice Questions	60%
Extended Matching Questions	25%
Key Features	10%
Short Response Essay Questions	15%
Total	100 %
Other Assessment Methods and Tools	Proportion (in Pass/Fail Decision)
Structured Oral Exam (SOE)	25%
Total	25%
Pass/Fail Decision	Proportion (in Pass/Fail Decision)
Pencil-Paper Tests	75%
Other Assessments Methods and Tools	25%
Total	100 %

Week 1

	Monday	Tuesday	Wednesday	Thursday	Friday
09.00-09.50	Introductory Session (Introduction to ENT) Yavuz Selim Pata	Lecture Acute Otitis Media İlhan Topaloğlu	Lecture Hearing Loss Müzeyyen Doğan	Lecture Vertigo Rasim Yılmazer	Lecture Diseases of the Oral Cavity Sevtap Akbulut
10.00 -10.50	Lecture Anatomy and Physiology of the Ear Müzeyyen Doğan	Lecture Chronic Otitis Media İlhan Topaloğlu	Lecture Hearing Loss Müzeyyen Doğan	Lecture Tinnitus Rasim Yılmazer	Lecture Diseases of the Oropharynx Sevtap Akbulut
11.00 -11.50	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) İlhan Topaloğlu	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) İlhan Topaloğlu
12.00 -12.50	Luch	Luch	Luch	Luch	Luch
13.00 -13.50	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) İlhan Topaloğlu	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) İlhan Topaloğlu
14.00 -14.50	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) İlhan Topaloğlu	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) İlhan Topaloğlu
15:00 17:50	Independent Learning	Independent Learning	Independent Learning	Independent Learning	Independent Learning

Week 2

	Monday	Tuesday	Wednesday	Thursday	Friday
09.00-09.50	Lecture Rhinitis and Sinusitis Yavuz Selim Pata	Lecture Salivary Gland Diseases <i>Zeynep Alkan</i>	Lecture Anatomy and Physiology of the Larynx Müzeyyen Doğan	Lecture Essential audiology and Newborn hearing screen Ömer Faruk Birkent	Lecture Lymph Nodes Pathologies and Neck Masses Zeynep Alkan
10.00-10.50	Lecture Rhinitis and Sinusitis Yavuz Selim Pata	Lecture Sleep Apnea, Snoring and their Treatments İlhan Topaloğlu	Lecture Malignant Tumors of the Larynx Müzeyyen Doğan	Lecture Essential audiology and Newborn hearing screen Ömer Faruk Birkent	Lecture Lymph Nodes Pathologies and Neck Masses Zeynep Alkan
11.00 -11.50	Clinical Experience (Outpatient) Yavuz Selim Pata	Clinical Experience (Outpatient) Yavuz Selim Pata	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) Ömer Faruk Birkent	Clinical Experience (Outpatient) İlhan Topaloğlu
12.00 -12.50	Lunch	Lunch	Lunch	Lunch	Lunch
13.00 -13.50	Clinical Experience (Outpatient) Yavuz Selim Pata	Clinical Experience (Outpatient) Yavuz Selim Pata	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) Ömer Faruk Birkent	Clinical Experience (Outpatient) İlhan Topaloğlu
14.00 -14.50	Clinical Experience (Outpatient) Yavuz Selim Pata	Clinical Experience (Outpatient) Yavuz Selim Pata	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) Ömer Faruk Birkent	Clinical Experience (Outpatient) İlhan Topaloğlu
15.00 -17.50	Independent Learning	Independent Learning	Independent Learning	Independent Learning	Independent Learning

Week 3

	Monday	Tuesday	Wednesday	Thursday	Friday
09.00-09.50	Lecture Ent Emergencies Yavuz Selim Pata	Clinical Experience (Outpatient) İlhan Topaloğlu	Lecture Congenital Laryngeal and Voice Disorders Müzeyyen Doğan	Clinical Experience (Outpatient) Yavuz Selim Pata	Assessment Session (Written Exam)
10.00-10.50	Lecture Ent Emergencies Yavuz Selim Pata	Clinical Experience (Outpatient) İlhan Topaloğlu	Lecture Congenital Laryngeal and Voice Disorders Müzeyyen Doğan	Clinical Experience (Outpatient) Yavuz Selim Pata	Assessment Session (Practical Exam)
11.00 -11.50	Clinical Experience (Outpatient) Yavuz Selim Pata	Clinical Experience (Outpatient) Ilhan Topaloğlu	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) Yavuz Selim Pata	(Fractical Exam)
12.00 -12.50	Lunch	Lunch	Lunch	Lunch	Lunch
13.00 -13.50	Clinical Experience (Outpatient) Yavuz Selim Pata	Clinical Experience (Outpatient) İlhan Topaloğlu	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) Yavuz Selim Pata	Program Evaluation Session Review of the Exam
14.00 -14.50	Clinical Experience (Outpatient) Yavuz Selim Pata	Clinical Experience (Outpatient) Ilhan Topaloğlu	Clinical Experience (Outpatient) Müzeyyen Doğan	Clinical Experience (Outpatient) Yavuz Selim Pata	Questions Evaluation of the Program Müzeyyen Doğan
15.00 -17.50	Independent Learning	Independent Learning	Independent Learning	Independent Learning	Independent Learning
