Information on the degree programme

FACULTY OF MEDICINE

MEDICAL EDUCATION PROGRAM

GENERAL DESCRIPTION OF THE PROGRAM

History

The medical education program has been established in the fall semester of the 1996-1997 educational term.

Qualification Awarded

Students who successfully complete the medical education program with defined competencies and proficiencies are entitled to have awarded with the “Doctor of Medicine” (M.D.) diploma and title which corresponds to second-cycle higher education (i.e. QF-EHEA-2, EQF-LLL-7, TYYÇ-7) with Master's Degree.

The medical education program is regulated in compliance with “Regulated Professions” legislation by EU 2005/36/EC Directive on the recognition of professional qualifications.

Medical education program is also in compliance with “Statement on the Bologna Process and Medical Education” (2005, WFME and AMEE; World Federation for Medical Education, Association for Medical Education in Europe) declaration that the two-cycle structure should be implemented as a long, integrated, one-tier program in which completion of the first cycle does not authorize any special use or employability of the bachelor.

The medical education program is equivalent to European Higher Education Area-Cycle 2, European Qualifications Framework- Lifelong Learning Level-7 and Turkish Council of Higher Education (CoHE, Türkiye Yükseköğretim Kurumu, YÖK) Turkish National Qualifications Framework for Higher Education (“TNQF-HE”, “Türkiye Yükseköğretim Yeterlilikler Çerçevesi”, “TYYÇ”) Level-7.

The medical education program consists of six full-time years with 360 ECTS in total corresponding to 1800 hours of student workload/year (6x1800=10800 hours in total), of which at least 51 % (5500 hours) is contact hours.

Specific Admission Requirements to the Program

Admission of the national students to the program is centralized and based on a nationwide one/two-stage examinations conducted by an independent public body (Assessment, Selection and Placement Center, ÖSYM) in compliance with the framework set by the regulations of Council of Higher Education (CoHE) of Turkey. Candidates are placed to higher education institutions on the basis of their composite scores composed of centralized exam scores and high school grade point averages.

Admission of foreign students to the program is by direct applications of candidates to the higher education institute based on publicly available national and institutional regulations.

A student who has started in a domestic or foreign equivalent program may apply for a transfer based on publicly available national and institutional regulations. Before the adoption period, each student's requirements and the application is considered an individual basis in accordance with their degrees.

National/foreign students may take specific courses of the program given in English/Turkish through a mutual agreement within the framework of the student exchange program.

Employment Opportunities for Graduates and Transition to Upper Levels:

Graduates of the program may obtain work placements;

as a physician or general practitioner in primary care institutions or organizations such as mother and child care centers, family medicine units, outpatient clinics of hospitals,

as a junior or senior manager in various private healthcare sector institutions or Ministry of Health,

as a medical or product manager in biomedical or pharmaceutical companies.

Graduates of the program may pursue higher education as a third cycle higher education (i.e. QF-EHEA-3, EQF-LLL-8, TYYÇ- 8) with “Specialization in Medicine” or “Doctorate Degree” in biological, medical, biotechnological, pharmaceutical, managerial or other scientific fields.

The medical education program also offers M.D./Ph.D. programs (e.g. Molecular Medicine, Neuroscience, Physiology, Pharmacology, Histology and Embriology, etc.) in collaboration with Yeditepe University Health Sciences Institute.

Graduation Requirements:

The student should successfully complete the full (six-year) program with 360 ECTS credits.

Graduation Degree

Graduation degree of the students is the average of final grades received for each of the six phases of the program. This “General Grade Average” is the graduation grade of the students.

As stated in the “YEDİTEPE UNIVERSITY MEDICAL FACULTY ACADEMIC REGULATIONS”:

Assessment of student achievement, notes

ARTICLE 14 -

(1) For each course in a phase, based on the numerical values of assessment scores of exam results, practical/laboratory/similar studies and other academic activities, a letter grade of success and a factor of success are assigned to students by the responsible faculty member the course.

For each course, the letter grade under “CC” fails. Achievement grades and factors are shown in the following table:

Letter Grade Success Factor

AA	4.0
BA	3.5
BB	3.0
CB	2.5
CC	2.0
FA	0.0 (Fail)
(who does not qualify to enter final exam/s or clerkship exam/s due to absenteeism)	
FF	0.0 (Fail)
(who enters the final exam/s or clerkship exam/s and does not succeed)	

Grade point average

ARTICLE 15 -

(1) To determine the achievements of students, phase grade and grade point average (GPA) for all phases are computed for each student at the end of each phase. The weight of scores of midterm exam/s and other studies in the phase grade cannot be less than 30% and greater than 70%.

(2) The total credit earned by a student in a course is computed by the credit value of the course multiplied by the success factor corresponding to the letter grade obtained.

(3) A student's average grade of the phase is the ratio of the total credits earned from the registered courses to the sum of the credit values of the courses.

(4) GPA is the ratio of the total credits earned in the accomplished phases to the sum of the credit values of all courses in the completed phases.

Appraisal of success for the family medicine (internship) period

ARTICLE 16 -

(1) In the family medicine (internship) phase, students are evaluated on each of the performance items either as successful or unsuccessful, based on their performances in history taking, epicrisis writing, attitude and care to the patients, attended night shifts, participated seminars/meetings, healthcare service in the wards, outpatient clinics, laboratories and field as well as on their level of theoretical knowledge and overall behaviour; and a corresponding letter grade for each internship in a medical discipline or subdiscipline is given. This grade is also used in the computation of GPA for graduation.

These procedures are subject to the provisions of the regulation set by the Council of Higher Education.

Course Category List (Phase I to VI)			ECTS
Phase I:			
Professional (Knowledge and Skills: normal structure and function at molecular, cellular, tissue and organ levels; introduction to clinical practice-basic clinical skills)			
(https://med.yeditepe.edu.tr/sites/default/files/phase_1_apk_2019_02.01.2020_baski.pdf)

Total Credits

Weeks (Educational Year: 41 weeks)

The curriculum applies to 2019-2020 educational term. The duration of the educational term for each year is shown in the table a total number of weeks. ECTS credits are the university credits of the courses in Yeditepe University Faculty of Medicine Undergraduate Medical Education Program. 1 ECTS=30 hours of workload including independent study hours per average student. GPA and cGPA calculations are based on ECTS credits.

¹Free Elective Courses. Only one of the free elective courses (i.e. with 2 ECTS credit value) provided either by Faculty of Medicine or other faculties in the university can be elected in an educational year. Free elective courses provided by Faculty of Medicine in the First Year: MED 611 Medical Anthropology, MED 612 Creative Drama I, MED 613 Medical Humanities, MED 619 Story Telling, MED 620 Art Culture and Life Style, MED 623 Visual Presentation in Medicine, MED 632 Music Appreciation. Free elective courses provided by Faculty of Medicine in the Second and Third Year: MED 614 Personal Trademark Development, MED Innovation Management, MED 616 Medical Management and New Services Design Skills, MED 617 Personal Brand Management Skills, MED 618 Research and Development in Pharmaceutical Industry, MED 619 Entrepreneurship and Storytelling Techniques for Business Purposes, MED 620 Art, Culture and Lifestyle, MED 621 Epidemiological Research and Evidence-Based Medicine, MED 622 Applications of Economics in Health Care, MED 623 Visual Presentation in Medicine, MED 624 Narrative Medicine, MED 627 Presentation of Medicine on Media, MED 628 Healthy Living, MED 629 Music and Medicine, MED 630 Health Law, MED 631 Creative Drama II.

²Common Courses. These courses are obligatory in all programs of the university. The university credit values of the common courses are as stated by the University Senate. With the exception of HUM 103, these courses are not to be included in the GPA and cGPA calculations. Courses on Turkish Language and Culture for Foreigners (AFYA). Based on the result of Turkish Language Proficiency Exam, instead of TKL 201 (FS) and TKL 202 (SS) courses, international students will be requested to take the required ones from the AFYA 101 (FS), AFYA 102 (SS), AFYA 201 (FS) and AFYA 202 (SS) courses, designed for them. Each of these courses has credits as Y=3 and E=5. These courses are not to be included in the GPA and cGPA calculations.

³Area Elective Courses. Only one of the provided courses can be elected in the sixth educational year. MED 650 Emergency Medicine, MED 651 Internal Medicine, MED 652 Child Health And Pediatrics, MED 653 Obstetrics and Gynecology, MED 654 General Surgery, MED 655 Cardiology, MED 656 Cardiovascular Surgery, MED 657 Clinic Ethics, MED 658 Plastic and Reconstructive Surgery, MED 659 Public Health, MED 660 Thoracic Surgery, MED 661 Orthopedics and Traumatology, MED 662 Ophthalmology, MED 663 Dermatology, MED 664 Otorhinolaryngology, MED 665 Neurology, MED 666 Neurosurgery, MED 667 Urology, MED 668 Anesthesiology and Reanimation, MED 669 Pediatric Surgery, MED 670 Psychiatry, MED 671 Physical Medicine and Rehabilitation, MED 672 Radiation Oncology, MED 673 Clinical Pharmacology, MED 674 Infectious Diseases & Clinical Microbiology, MED 675 Radiology, MED 676 Nuclear Medicine, MED 677 Forensic Medicine, MED 678 Child Psychiatry, MED 679 Medical Genetics, MED 680 Medical Microbiology, MED 681 Pathology, MED 682 Medical Biochemistry.

**YEDİTEPE UNIVERSITY FACULTY OF MEDICINE
PROGRAM OUTCOMES
© 2015**

The aim of the medical education program is to graduate physicians who;

- are aware of the local and global health issues
- have acquired competence in knowledge, skills and attitudes to manage and provide primary health care service
- know, apply and care for ethical principles of the medical profession
- keep up with current knowledge at national and international level
- are capable of systematical thinking
- are investigative and questioning
- continually renovate and improve themselves
- are capable of teamwork
- use technology competently in medicine and related areas
- have effective communication skills
- have community leadership qualifications

Program Learning Outcomes^{*,}**

***Abbreviations:**

PO: Program Outcomes

POD: Program Outcomes Domain

PODG: Program Outcomes Domain Group

YUFM: Yeditepe University Faculty of Medicine

BCC-CC: Yeditepe University Bologna Process Compliance Council-Faculty of Medicine Consultancy Committee

****Explanations:**

Program Outcomes: A competency that the medical graduate should have

Program Outcomes Domain: The classification of competencies that the medical graduate should have based on competency areas

Program Outcomes Domain Group: The classification of competency areas based on the overall characteristics that the medical graduate should have when practising own profession as a physician.

Reminder

Terms of "Program Outcomes" and "Competencies" are used interchangeably in the manuscript.

1. Basic Professional Competencies

- 1.1. Clinical Competencies
- 1.2. Competencies related to Communication
- 1.3. Competencies Related to Leadership and Management
- 1.4. Competencies related to Health Advocacy
- 1.5. Competencies related to Research
- 1.6. Competencies related to Health Education and Counseling

2. Professional Values and Perspectives

- 2.1. Competencies related to Law and Legal Regulations
- 2.2. Competencies Related to Ethical Aspects of Medicine
- 2.3. Competencies Related to Social and Behavioral Sciences
- 2.4. Competencies Related to Social Awareness and Participation
- 2.5. Competencies Related to Professional Attitudes and Behaviors

3. Personal Development and Values

- 3.1. Competencies Related to Lifelong Learning
- 3.2. Competencies Related to Career Management
- 3.3. Competencies Related to Protection and Development of Own Physical and Mental Health

PODG.1. Basic Professional Competencies

POD.1.1. Clinical Competencies

The medical graduate (physician);

PO.1.1.1. values preventive health services, **offers** primary prevention (i.e. prevention of diseases for the protection of health), secondary prevention (i.e. early diagnosis and treatment) tertiary prevention (i.e. rehabilitation) and quaternary

prevention (i.e. prevention of excessive and unnecessary diagnosis and treatment) services, provides consultancy on these issues.

PO.1.1.2. employs a patient-centered approach in patient management.

PO.1.1.3. recognizes most frequently occurring or significant clinical complaints, symptoms, signs, findings and their emergence mechanisms in clinical conditions.

PO.1.1.4. takes a medical history from the applicant himself/herself or from the individual's companions.

PO.1.1.5. does general and focused physical and mental examination.

PO.1.1.6. interprets findings in medical history, physical and mental examination.

PO.1.1.7. employs diagnostic procedures that are used frequently at the primary health care level.

PO.1.1.8. selects tests that have evidence-based high efficacy at the primary health care level and interpret results.

PO.1.1.9. makes clinical decisions using evidence-based systematic data in health care service.

PO.1.1.10. performs medical interventional procedures that are used frequently at the primary health care level.

PO.1.1.11. manages healthy individuals and patients in the context of health care services.

PO.1.1.12. keeps medical records in health care provision and **uses** information systems to that aim.

POD.1.2. Competencies related to Communication

The medical graduate (physician);

PO.1.2.1. throughout his career, **communicates** effectively with health care beneficiaries, co-workers, accompanying persons, visitors, patient's relatives, caregivers, colleagues, other individuals, organizations and institutions.

PO.1.2.2. collaborates as a team member with related organizations and institutions, with other professionals and health care workers, on issues related to health.

PO.1.2.3. recognizes the protection and privacy policy for health care beneficiaries, co-workers, accompanying persons and visitors.

PO.1.2.4. communicates with all stakeholders taking into consideration the socio-cultural diversity.

POD.1.3. Competencies Related to Leadership and Management

The medical graduate (physician);

PO.1.3.1. manages and **leads** within the health care team in primary health care organization.

PO.1.3.2. recognizes the health management and the principles of health sector economy, models of organization and financing of health care services.

PO.1.3.3. recognizes the resources in the health care service, the policy (principles) for cost-effective use.

POD.1.4. Competencies related to Health Advocacy

The medical graduate (physician);

PO.1.4.1. recognizes the health status of the individual and the community (population) and the factors affecting the health, **implements** the necessary measures to prevent effects of these factors on the health.

PO.1.4.2. recognizes and **manages** the health determinants including conditions that prevent access to health care.

POD.1.5. Competencies related to Research

The medical graduate (physician);

PO.1.5.1. develops, prepares and **presents** research projects.

POD.1.6. Competencies related to Health Education and Counseling

The medical graduate (physician);

PO.1.6.1. provides consultancy services and **organizes** health education for the community to sustain and promote the health of individual and community.

PODG.2. Professional Values and Perspectives

POD.2.1. Competencies related to Law and Legal Regulations

The medical graduate (physician);

PO.2.1.1. *performs* medical practices in accordance with the legal framework which regulates the primary health care service.

POD.2.2. Competencies Related to Ethical Aspects of Medicine

The medical graduate (physician);

PO.2.2.1. *recognizes* basic ethical principles completely, and ***distinguishes*** ethical and legal problems.

PO.2.2.2. *values* the rights of the patient, patient's relatives and physicians, and ***provides*** services in this context.

POD.2.3. Competencies Related to Social and Behavioral Sciences

The medical graduate (physician);

PO.2.3.1. *relates* historical, anthropological and philosophical evolution of medicine, with the current medical practice.

PO.2.3.2. *recognizes* the individual's behaviour and attitudes and factors that determine the social dynamics of the community.

POD.2.4. Competencies Related to Social Awareness and Participation

The medical graduate (physician);

PO.2.4.1. *leads* community with a sense of responsibility, behaviour and attitudes, in consideration of individual behaviours and social dynamics of the community, and if there is a necessity, ***develop*** projects directed towards health care services.

POD.2.5. Competencies Related to Professional Attitudes and Behaviors

The medical graduate (physician);

PO.2.5.1. *adopts* a patient-centered and holistic (biopsychosocial) approach to patients and their problems.

PO.2.5.2. *respects* patients, colleagues and all stakeholders in health care delivery.

PO.2.5.3. *displays* the proper behaviour in case of disadvantaged groups and situations in the community.

PO.2.5.4. *takes* responsibility for the development of patient safety and healthcare quality.

PO.2.5.6. *evaluates* own performance as open to criticism, ***recognizes*** the qualifications and limitations.

PODG.3. Personal Development and Values

POD.3.1. Competencies Related to Lifelong Learning

The medical graduate (physician);

PO.3.1.1. *values* the importance of lifelong self-learning and ***implements***.

PO.3.1.2. *recognizes the* importance of updating knowledge and skills; searches current advancements and ***improves*** own knowledge and skills.

PO.3.1.3. *uses* English language at least at a level adequate to follow the international literature and to establish good communication related to the profession.

POD.3.2. Competencies Related to Career Management

The medical graduate (physician);

PO.3.2.1. *recognizes* and *investigates* postgraduate work domains and job opportunities.

PO.3.2.2. *recognizes* the requirements for application to postgraduate work/job domains, and ***distinguishes*** and ***plans*** any requirement for further training and work experience.

PO.3.2.3. *prepares* a resume, and ***recognizes*** job interview methods.

POD.3.3. Competencies Related to Protection and Development of Own Physical and Mental Health

The medical graduate (physician);

PO.3.3.1. *implements* the rules of healthy living for her/himself.

PO.3.3.2. *displays* appropriate behaviour specific to work under stressful conditions. **PO.3.3.3. *uses*** self-motivation factors.

EDUCATIONAL METHODS (TEACHING, TRAINING, LEARNING)

Teaching/learning methods and strategies are selected so as to increase the skills of the students in self-study, lifelong learning, observation, teaching, presentation, critical thinking, teamwork, effective use of informatics.

Besides, teaching styles that support students with different abilities are preferred.

Education and teaching methods used in the program are listed below.

(*) One or more of the methods described here can be applied depending on the features of course.

(**) T=Theoretical, P=Practical.

TEACHING, TRAINING, LEARNING ACTIVITIES		
CONTACT STUDY		
Theoretical-Class/Auditorium/Conference Hall		
	Principal learning activities	Tools Employed
Lecture/Tutorial	Listening and comprehension	Standard classroom technologies, multimedia tools, computer, video projector
Case report	Listening and comprehension, observation, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video projector
Case presentation	Listening and comprehension, observation, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video projector
Research Seminar	Listening and comprehension, observation, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video projector
Student Seminar/Journal Club	Listening and comprehension, observation, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video

		projector
Invited speaker	Listening and comprehension, observation, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video projector
Hospital Conference	Listening and comprehension, observation, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video projector
Online/Distance or e-learning (paper-based or ICT based)	Listening and comprehension, observation, interaction, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video projector
Theoretical-Group Activity/Interactive		
Case discussion	Listening and comprehension, observation, interaction, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video projector
Small group study/Problem-based learning sessions	Listening and comprehension, observation, interaction, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video projector
Exercise class	Listening and comprehension, observation, interaction, critical thinking, questioning	Laboratory technologies, multimedia tools, computer, video projector
Oral presentation and criticism	Listening and comprehension, observation, interaction, critical thinking, questioning	Standard classroom technologies, multimedia tools, computer, video projector
Practice Based-Laboratory/Class		
Demonstration class	Listening and comprehension, observation, experimentation, interaction, critical thinking, questioning	Laboratory technologies, multimedia tools, computer, video projector
Laboratory teaching	Listening and comprehension, observation, experimentation, interaction, critical thinking, questioning	Laboratory technologies, multimedia tools, computer, video projector
Clinical skills laboratory	Listening and comprehension, observation, experimentation, performance, interaction, critical thinking, questioning	Laboratory technologies, simulated patients, phantoms, multimedia tools, computer, video projector
Exercise class	Listening and comprehension, observation, experimentation, interaction, critical thinking, questioning	Laboratory technologies, multimedia tools, computer, video projector
Clerkship (Clinical practice and training)		
Outpatient clinic	Clinical practice	Clinical setting
Patient bedside	Clinical practice	Clinical setting
Imaging round	Clinical practice	Clinical setting
Laboratory round	Clinical practice	Clinical setting
Grand round	Clinical practice	Clinical setting
Operating room	Clinical practice	Clinical setting
Invasive Intervention room	Clinical practice	Clinical setting
Night shift at ward	Clinical practice	Clinical setting
Night shift at the intensive care unit	Clinical practice	Clinical setting
Night shift at the emergency care unit	Clinical practice	Clinical setting
Work placement/Internship (Clinical performance under supervision)		
Field study/Fieldwork	Clinical performance	Clinical setting
Outpatient clinic	Clinical performance	Clinical setting
Patient bedside	Clinical performance	Clinical setting
Imaging round	Clinical performance	Clinical setting
Laboratory round	Clinical performance	Clinical setting
Work-based practice	Clinical performance	Clinical setting
Grand round	Clinical performance	Clinical setting
Operating room	Clinical performance	Clinical setting
Invasive intervention room	Clinical performance	Clinical setting

Night shift at ward	Clinical performance	Clinical setting
Night shift at the intensive care unit	Clinical performance	Clinical setting
Night shift at the emergency care unit	Clinical performance	Clinical setting
INDEPENDENT STUDY		
Independent study for theoretical exam/s	Reading, writing, investigation, critical thinking, questioning, comprehension, verification	Learning center, library, student laboratories, study room, references, lecture slides, lecture notes
Independent study for oral/practical exam/s	Reading, writing, practising, experimentation, performance, investigation, critical thinking, questioning, comprehension, verification	Learning center, library, student laboratories, study room, references, lecture slides, lecture notes
Research paper writing	Reading, writing, investigation, critical thinking, questioning, comprehension, verification	Learning center, library, student laboratories, study room, references, lecture slides, lecture notes
Project writing	Reading, writing, investigation, critical thinking, questioning, comprehension, verification	Learning center, library, student laboratories, study room, references, lecture slides, lecture notes
Report writing	Reading, writing, investigation, critical thinking, questioning, comprehension, verification	Learning center, library, student laboratories, study room, references, lecture slides, lecture notes
Homework	Reading, writing, investigation, critical thinking, questioning, comprehension, verification	Learning center, library, student laboratories, study room, references, lecture slides, lecture notes
Investigation/Survey study	Reading, writing, investigation, critical thinking, questioning, comprehension, verification	Learning center, library, student laboratories, study room, references, lecture slides, lecture notes
