COORDINATION COMMITTEES

(TEACHING YEAR 2022 – 2023)

PHASE-III COORDINATION COMMITTEE

Emine Nur ÖZDAMAR, MD, Assist. Prof. (Coordinator)
Erdem SÖZTUTAR, MD, Assist. Prof. (Co-coordinator)
Cenk Andaç, MD, Assist. Prof. (Co-coordinator)
Ebru ÇAYIR, MD, Assist. Prof. (Co-coordinator)
Sanem Aslıhan Aykan, Assist. Prof. (Co-coordinator)
Başak ARU, PhD, (Co-coordinator)

ICP-III COORDINATION COMMITTEE

Özlem TANRIÖVER, MD, Prof. (Coordinator)
Ayşe Arzu AKALIN, MD, Assist. Prof. (Co-coordinator)

ELECTIVE COURSES COORDINATION COMMITTEE

Ayşe Arzu AKALIN, MD, Assist. Prof. (Coordinator)
Seda GÜLEÇ, PhD. Assoc. Prof. (Co-coordinator)

ACADEMIC CALENDAR of PHASE III 2022 - 2023

INTRODUCTION to CLINICAL SCIENCES (MED 302)

COMMITTEE I

INFECTIOUS DISEASES & HEMATOPOIETIC SYSTEMS (8 Weeks)

Beginning of Committee	**September 5, 2022**	**Monday**
End of Committee	**October 28, 2022**	**Friday**
Committee Exam	**October 26, 2022**	**Wednesday**
National Holiday	**October 28$^{1/2}$, 2022** **October 29, 2022**	**Friday, Saturday**

COMMITTEE II

CARDIOLOGY and RESPIRATORY SYSTEMS (7 Weeks)

Beginning of Committee	**October 31, 2022**	**Monday**
End of Committee	**December 16, 2022**	**Friday**
Committee Exam	**December 15, 2022**	**Thursday**
Commemoration of Atatürk	**November 10, 2022**	**Thursday**

COMMITTEE III

GASTROINTESTINAL SYSTEM (4 Weeks)

Beginning of Committee	**December 19, 2022**	**Monday**
End of Committee	**January 13, 2023**	**Friday**
Committee Exam	**January 13, 2023**	**Friday**
New Year	**January 01, 2023**	**Sunday**

COMMITTEE IV

ENDOCRINE, REPRODUCTIVE and URINARY SYSTEMS (7 Weeks)

Beginning of Committee	**January 16, 2023**	**Monday**
End of Committee	**March 17, 2023**	**Friday**
Committee Exam	**March 16, 2023**	**Thursday**
MIDTERM BREAK	**Jan 23 – Feb 3, 2023**	
Physicians' Day	**March 14, 2023**	**Tuesday**

COMMITTEE V

NERVOUS SYSTEM and PSYCHIATRY (7 Weeks)

Beginning of Committee	**March 20, 2023**	**Monday**
End of Committee	**May 5, 2023**	**Friday**
Committee Exam	**May 5, 2023**	**Friday**
Religious Holiday	**April 20$^{1/2}$ – 23, 2023**	**Thursday - Sunday**

National Holiday	**April 23, 2023**	**Sunday**
Labor's Day	**May 01, 2023**	**Monday**

COMMITTEE VI
MUSCULOSKELETAL SYSTEM (5 Weeks)

Beginning of Committee	**May 8, 2023**	**Monday**
End of Committee	**June 9, 2023**	**Friday**
Committee Exam	**June 9, 2023**	**Friday**
National Holiday	**May 19, 2023**	**Friday**

SCIENTIFIC RESEARCH and PROJECT

Midterm Assesment	**Jan 20, 2023**	**Friday**
Final Assesment	**May 26, 2023**	**Friday**

INTRODUCTION to CLINICAL SCIENCES (MED 302):

Make-up Exam	**June 14-16, 2023**	**Wednesday – Friday**
Final Exam	**July 5, 2023**	**Wednesday**
Incomplete Exam	**July 25, 2023**	**Tuesday**

INTRODUCTION to CLINICAL PRACTICE – III (MED 303):

Beginning of ICP - III	**Sept 26, 2022**	**Monday**
End of ICP - III	**May 26, 2023**	**Friday**
Midterm Exam	**March 29,30,31, 2023**	**Wednesday – Friday**
Make-up Exam	**May 24, 2023**	**Wednesday**
Final Exam	**June 12-14, 2023**	**Monday - Wednesday**
Incomplete Exam	**July 26, 2023**	**Wednesday**

FREE ELECTIVE COURSES:

Introduction to Elective Courses	**Dec 7, 2022**	**Wednesday**
Beginning of Elective Courses	**Feb 10, 2023**	**Friday**
End of Elective Courses	**May 26, 2023**	**Friday**
Midterm Exam	**March 24, 2023**	**Friday**
Make-up Exam	**May 29-June2, 2023**	**Monday-Friday**
Final Exam	**June 12-23, 2023**	**Monday- Friday**
Incomplete Exam	**July 3-14, 2023**	**Monday- Friday**

COORDINATION COMMITTEE MEETINGS

1st Coordination Committee Meeting:	**October 20, 2022**	**Thursday**
2nd Coordination Committee Meeting: (with student participation)	**January 10, 2023**	**Tuesday**
3rd Coordination Committee Meeting: (with student participation)	**May 23, 2023**	**Tuesday**
4th Coordination Committee Meeting:	**July 11, 2023**	**Tuesday**

YEDİTEPE UNIVERSITY FACULTY OF MEDICINE

AIM OF MEDICAL EDUCATION PROGRAM

*"Consensus Commission Report" based on draft compiled at "*Workshop for Revision of Aim and Outcomes of Medical Education Program at Yeditepe University Faculty of Medicine*"

AIM

The aim of medical education program ***is to graduate physicians*** who

- **are aware of** the local and global health issues
- **have acquired competence** in knowledge, skills and attitudes to manage and provide primary health care service
- **know**, **apply** and **care** for ethical principles of the medical profession
- **keep up with** current knowledge at national and international level
- **are capable of** systematical thinking
- **are** investigative and questioning
- continually **renovate** and **improve** themselves
- **are capable of** teamwork
- **use** technology competently in medicine and related areas
- **have** effective communication skills
- **have** community leadership qualifications

YEDİTEPE UNIVERSITY FACULTY OF MEDICINE

PROGRAM OUTCOMES OF MEDICAL EDUCATION PROGRAM

Abbreviations: PO: Program Outcomes, POD: Program Outcomes Domain, PODG: Program Outcomes Domain Group

PODG.1. Basic Professional Competencies

POD.1.1. Clinical Competencies

PO.1.1.1. ***values*** preventive health services, ***offers*** primary prevention (i.e. prevention of diseases for the protection of health), secondary prevention (i.e. early diagnosis and treatment) tertiary prevention (i.e. rehabilitation) and quaternary prevention (i.e. prevention of excessive and unnecessary diagnosis and treatment) services, ***provides*** consultancy on these issues.
PO.1.1.2. ***employs*** a patient-centered approach in patient management.
PO.1.1.3. ***recognizes*** most frequently occurring or significant clinical complaints, symptoms, signs, findings and their emergence mechanisms in clinical conditions.
PO.1.1.4. ***takes*** medical history from the applicant himself/herself or from the individual's companions.
PO.1.1.5. ***does*** general and focused physical and mental examination.
PO.1.1.6. ***interprets*** findings in medical history, physical and mental examination.
PO.1.1.7. ***employs*** diagnostic procedures that are used frequently at the primary health care level.
PO.1.1.8. ***selects*** tests that have evidence-based high efficacy at the primary health care level and ***interprets*** results.
PO.1.1.9. ***makes*** clinical decisions using evidence-based systematic data in health care service.
PO.1.1.10. ***performs*** medical interventional procedures that are used frequently at the primary health care level.
PO.1.1.11. ***manages*** healthy individuals and patients in the context of health care services.
PO.1.1.12. ***keeps*** medical records in health care provision and ***uses*** information systems to that aim.

POD.1.2. Competencies related to Communication

PO.1.2.1. throughout his/her career, ***communicates*** effectively with health care beneficiaries, co-workers, accompanying persons, visitors, patient's relatives, care givers, colleagues, other individuals, organizations and institutions.
PO.1.2.2. ***collaborates*** as a team member with related organizations and institutions, with other professionals and health care workers, on issues related to health.
PO.1.2.3. ***recognizes*** the protection and privacy policy for health care beneficiaries, co-workers, accompanying persons and visitors.
PO.1.2.4. ***communicates*** with all stakeholders taking into consideration the socio-cultural diversity.

POD.1.3. Competencies Related to Leadership and Management

PO.1.3.1. ***manages*** and ***leads*** within the health care team in primary health care organization.
PO.1.3.2. ***recognizes*** the principles of health management and health sector economy, models of organization and financing of health care services.
PO.1.3.3. ***recognizes*** the resources in the health care service, the principles for cost-effective use.

POD.1.4. Competencies related to Health Advocacy

PO.1.4.1. ***recognizes*** the health status of the individual and the community and the factors affecting the health, ***implements*** the necessary measures to prevent effects of these factors on the health.
PO.1.4.2. ***recognizes*** and ***manages*** the health determinants including conditions that prevent access to health care.

POD.1.5. Competencies related to Research

PO.1.5.1. *develops*, ***prepares*** and ***presents*** research projects

POD.1.6. Competencies related to Health Education and Counseling

PO.1.6.1. *provides* consultancy services and ***organizes*** health education for the community to sustain and promote the health of individual and community**.**

PODG.2. Professional Values and Perspectives

POD.2.1. Competencies related to Law and Legal Regulations

PO.2.1.1. *performs* medical practices in accordance with the legal framework which regulates the primary health care service.

POD.2.2. Competencies Related to Ethical Aspects of Medicine

PO.2.2.1. *recognizes* basic ethical principles completely, and ***distinguishes*** ethical and legal problems.

PO.2.2.2. *pays importance to* the rights of patient, patient's relatives and physicians, and ***provides*** services in this context.

POD.2.3. Competencies Related to Social and Behavioral Sciences

PO.2.3.1. *relates* historical, anthropological and philosophical evolution of medicine, with the current medical practice.

PO.2.3.2. *recognizes* the individual's behavior and attitudes and factors that determine the social dynamics of the community.

POD.2.4. Competencies Related to Social Awareness and Participation

PO.2.4.1. *leads* community with sense of responsibility, behavior and attitudes in consideration of individual behaviors and social dynamics of the community, and if there is a necessity, ***develops*** projects directed towards health care services.

POD.2.5. Competencies Related to Professional Attitudes and Behaviors

PO.2.5.1. *displays* a patient-centered and holistic (biopsychosocial) approach to patients and their problems.

PO.2.5.2. *respects* patients, colleagues and all stakeholders in health care delivery.

PO.2.5.3. *displays* the proper behavior in case of disadvantaged groups and situations in the community.

PO.2.5.4. *takes* responsibility for the development of patient safety and healthcare quality.

PO.2.5.6. *evaluates* own performance as open to criticism, ***realizes*** the qualifications and limitations.

PODG.3. Personal Development and Values

POD.3.1.Competencies Related to Lifelong Learning

PO.3.1.1. *embraces* the importance of lifelong self-learning and ***implements***.

PO.3.1.2. *embraces* the importance of updating knowledge and skills; ***searches*** current advancements and ***improves*** own knowledge and skills.

PO.3.1.3. *uses* English language at least at a level adequate to follow the international literature and to establish communication related to the profession.

POD.3.2. Competencies Related to Career Management

PO.3.2.1. *recognizes* and ***investigates*** postgraduate work domains and job opportunities.

PO.3.2.2. *recognizes* the application requirements to postgraduate work/job domains, and ***distinguishes*** and ***plans*** any requirement for further training and work experience.

PO.3.2.3. *prepares* a resume, and ***recognizes*** job interview methods.

POD.3.3. Competencies Related to Protection and Development of Own Physical and Mental Health

PO.3.3.1. *implements* the rules of healthy living.

PO.3.3.2. *displays* appropriate behavior specific to work under stressful conditions.

PO.3.3.3. *uses* self-motivation factors.

INSTRUCTIONAL DESIGN of PRECLINICAL YEARS

In Phase I, II and III, the formation of committees is based on a thematic structure. This structure corresponds to organizational levels of the human body such as macromolecule, organelle, cell, tissue, organ systems and finally introduction to pathogenesis.

- Phase I: Normal structure and function of the human body at molecular, cellular, tissue and organ level.
- Phase II: Normal structure and function of human body at system and multi-system level, and introduction to pathogenesis.
- Phase III: Physiopathological and pathological processes in the human body.

Besides this thematic structure, there is a continuous clinical skills education in Phase I, II and III, as “Introduction to Clinical Practice -I, -II and -III” courses.

Therefore, the core medical courses are;

- Phase I: MED 104 Basic Medical Sciences I, MED 102 Introduction to Clinical Practice I, MED 103 Anatomical Drawing,
- Phase II: MED 201 Basic Medical Sciences II, MED 202 Introduction to Clinical Practice II,
- Phase III: MED 302 Introduction to Clinical Sciences, MED 303 Introduction to Clinical Practice III.

The learning objectives of each phase include learning objectives of core committees. The learning objectives of committees include learning objectives of core topics’ components for the committee.

CURRICULUM OF YEDİTEPE UNIVERSITY 2022-2023
PHASE III

CODE		THIRD YEAR	W	T	A	L	Y	E
MED	302	Introduction to Clinical Sciences	39	673		16		53
MED	303	Introduction to Clinical Practice III	34	11		22		5
MED	XXX	Free Elective Course[1] (SS)	14	28				2
Total Credits								60

The curriculum applies to 2022-2023 educational term. The duration of educational term for each year is shown in the table as total number of weeks. ECTS credits are the university credits of the courses in Yeditepe University Faculty of Medicine Undergraduate Medical Education Program. 1 ECTS=30 hours of workload including independent study hours per average student. GPA and cGPA calculations are based on ECTS credits.

[1]Free Elective Courses. At least one free elective course offered by the Faculty of Medicine or other faculties must be selected in an academic year. Free elective courses provided by Faculty of Medicine in the first three years: MED 611 Medical Anthropology, MED 612 Creative Drama I, MED 613 Medical Humanities, MED 614 Personal Trademark Development, ,MED 615 Innovation Management, MED 616 Medical Management and New Services Design Skills, MED 619 Entrepreneurship and Storytelling Techniques for Business Purposes, MED 620 Art, Culture and Life Styles, MED 621 Epidemiological Research and Evidence Based Medicine, MED 622 Applications of Economics in Health Care, MED 623 Visual Presentation in Medicine, MED 627 Presentation of Medicine on Media, MED 628 Healthy Living, MED 629 Music and Medicine, MED 630 Health Law, MED 631 Creative Drama II, MED 632 Music Appreciation, MED 633 Communication with Hearing Impaired Patients in Turkish Sign Language, MED 634 Case Based Forensic Science, MED 635 Advanced Level Communication with Hearing Impaired Patients in Turkish Sign Language.

[2]Common Courses. These courses are obligatory in all programs of the university. The university credit values of the common courses are as stated by the University Senate. Except for HUM 103, these courses are not to be included in the GPA and cGPA calculations. Courses on Turkish Language and Culture for Foreigners (AFYA). Based on the result of Turkish Language Proficiency Exam, instead of TKL 201 (FS) and TKL 202 (SS) courses, international students will be requested to take the required ones from the AFYA 101 (FS), AFYA 102 (SS), AFYA 201 (FS) and AFYA 202 (SS) courses, designed for them. Each of these courses have credits as Y=3 and E=5. These courses are not to be included in the GPA and cGPA calculations.

T: Theoretical, A: Application , L: Laboratory, Y: Yeditepe University Credit, E: ECTS Credit	**Minimum Degree Requirements**	
NC: Non-Credit Course, FS: Fall Semester, SS: Spring Semester, W: Weeks.	**ECTS**	**360**
Approval Date:	**Number of courses**	**53**

* Please see https://med.yeditepe.edu.tr/sites/default/files/curriculum_2022-23_ytf_tr.docx for total curriculum of Med Fac.

DESCRIPTION and CONTENT of PHASE III

Physio-pathological processes and pathological processes.

Infectious Diseases, Cardiovascular System, Respiratory System, Hematopoietic System, Gastrointestinal System, Endocrine System, Urogenital System, Nervous System, Psychiatry, Musculoskeletal System, Basic Clinical Skills, Biomedical Ethics and Deontology, Biostatistics.

Emergency Medicine, Family Medicine, Anesthesiology and Reanimation, Neurosurgery, Biostatistics, Biomedical Ethics and Deontology, Pediatrics, Pediatric Surgery, Pediatric Psychiatry, Endocrinology, Infectious Diseases, Immunology, Phytotherapy, Physical Therapy and Rehabilitation, Physiopathology, Gastroenterohepathology, General Surgery, Pulmonary Diseases, Thoracic Surgery, Ophtalmology, Public Health, Hematology/Oncology, Obstetrics and Gynecology, Cardiology, Otorhinolaryngology, Nephrology, Neurology, Orthopedics and Traumatology, Pathology, Psychiatry, Radiology, Rheumatology, Medical Pharmacology, Medical Genetics, Medical Microbiology, Urology, Medical Education.

AIMS and LEARNING OBJECTIVES of PHASE III

AIMS

In evidence based manner:

1. ***to remind*** anatomy, histology and physiology of body systems,
2. ***to convey*** necessary knowledge, related to body systems, on prevention of clinical conditions' emergence, protection and improvement of health in healthy conditions.
3. at multi-system level or related to a body system, for clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency;
3.1. ***to convey*** necessary knowledge on risk factors, etiopathogenesis, physiopathology, and pathology,
3.2. ***to convey*** knowledge on epidemiology,
3.3. ***to convey*** knowledge on frequently encountered clinical complaints, symptoms, signs and findings,
3.4. ***to convey*** necessary knowledge on health care processes, clinical decision making process, clinical decisions and clinical practices, with performance measures, for managing at the level of 7primary health care service,
4. ***to convey*** knowledge on pharmacology of drugs that are effective at multi-system level, specifically on a body system or on clinical conditions involving a specific body system,
5. ***to convey*** knowledge on phytotherapeutic agents that are effective at multi-system level, specifically on a body system or on clinical conditions involving a specific body system,
6. ***to convey*** knowledge on biostatistical analysis,
7. ***to convey*** basic legal and ethical principles that should be followed in practice of medical profession,
8. ***to equip with*** basic and advanced professional and clinical (interventional or non-interventional) skills necessary for practice of medical profession.

LEARNING OBJECTIVES

At the end of this phase, student should be able to:

1.0. ***recall*** anatomy, histology and physiology of body systems.
2.0. ***list*** necessities for prevention of clinical conditions' emergence, protection and improvement of health in healthy conditions in relation to body systems.
3.0. ***explain*** risk factors and etiopathogenesis, at multi-system level or related to a body system, of clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency.
4.0. at cellular or tissue level,
4.1. ***recognize*** morphological characteristics,
4.2. ***show*** basic pathological changes that occur in clinical conditions.
5.0. at multi-system level or related to a body system, of clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency;
5.1. ***explain*** mechanisms of destruction at molecule, cell, tisssue, organ, system, multi-system and organismal level,
5.2. ***describe*** structural and functional changes caused,
5.3. ***list*** clinical courses in time.
6.0. ***explain*** mechanisms of emergence for frequently encountered;
6.1. clinical complaints,
6.2. symptoms,
6.3. signs,
6.4. laboratory and imaging findings
of clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency.
7.0. at multi-system level or related to a body system,
• for healthy conditions in an individual or community with a request, or
• in an individual with clinical complaint, symptom, sign or laboratory/imaging finding or in a community,
• for clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency,
explain in an evidence-based manner and with performance measures from the aspects of reliability, practicality and outcomes,
• health care processes,

• acquisition of subjective or objective data, information and knowledge required for clinical decision making,
• clinical decision making process,
• clinical decisions and
• clinical practices
which are required for management at primary health care service level.
7.1. practice of history taking and physical examination (*cardiovascular, pulmonary, gastrointestinal, gynecological, breast, neonatal, prepubertal/pubertal, neurological/neuropsychiatric, musculoskeletal*)
7.2. evaluation of emergency case (*sepsis and septic shock, dyspnea, acute abdominal pain, urological emergencies, neurological emergencies, trauma*)
7.3. approach to healthy individual or patient (*fever, cardiovascular disease, chest pain, cough and hemoptysis, dyspnea, anemia, lymphadenopathy, diarrhea, pregnancy, urinary tract infection, neurological symptoms, headache, depression, dementia, musculoskeletal dysfunction*)
7.4. laboratory and imaging tests/examinations
7.4.1. based on laboratory disciplines/subdisciplines;
1. medical biochemistry tests:
i. *(venous blood collection*)
ii. *(thyroid function tests, diabetes tests)*
2. medical microbiology tests:
i. *(urine sample collection, throat swab specimen, sputum sample collection, urethral-vaginal-cervical discharge/swab specimen, fecal specimen collection, wound sample collection, blood collection for culture*)
ii. *(urine strip/dipstick test, urine culture, rapid screening (antigen/antibody) tests, throat culture, sputum culture, urethral-vaginal-cervical discharge culture, fecal culture, wound culture, blood culture)*
3. medical pathology tests:
i. *Pap smear collection*
ii. *Pap smear*
4. other laboratory tests:
i. *(peripheral/venous blood collection for hematology tests, blood sample collection for therapeutic drug monitoring)*
ii. *(pulmonary function tests, hematology tests for anemia, monitarization of drug therapy)*

5. radiological examinations: *(radiological examinations in gynecology, breast imaging, uroradiology, conventional neuroradiological examinations, spinal neuroradiology, cranial CT, cranial MRI, radiological imaging of musculoskeletal system, radiological examinations in benign ve malign tumors of bones)*
6. nuclear medicine examinations: *(nuclear medicine tests in infectious diseases, radionuclide ventriculography, myocardial scintigraphy, cardiac PET, ventilation/perfusion scintigraphyi, PET in lung cancer, nuclear medicine tests in hematology, scintigraphy of liver/spleen, PET in gastrointestinal system tumors, radioisotope imaging of thyroid and parathyroid, renal scintigrahy (GFR, ERPF, Renogram), brain perfusion scintigraphy, brain PET, bone scintigraphy)*

7.4.3. point of care testing
a. based on laboratory disciplines/subdisciplines;
1. medical biochemistry tests: *(diabetes tests, cardiac markers, coagulation tests, blood gases).*
2. medical microbiology tests: *(urine strip/dipstick test, rapid screening (antigen/antibody tests)*
3. other laboratory testsi: *(hematology-peripheral blood smear examination, hematology-complete blood count)*

7.5. making preliminary diagnosis or definitive diagnosis decision
7.6. making non-intervention or intervention decision
7.7. practicing non-intervention or intervention
7.8. referral/transport of healthy individual or patient

AIM and LEARNING OBJECTIVES of CLINICAL SCIENCES (MED 302)

AIMS

In evidence based manner:

1. ***to remind*** anatomy, histology and physiology of body systems,
2. ***to convey*** necessary knowledge, related to body systems, on prevention of clinical conditions' emergence, protection and improvement of health in healthy conditions.
3. at multi-system level or related to a body system, for clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency;
3.1. ***to convey*** necessary knowledge on risk factors, etiopathogenesis, physiopathology, and pathology,
3.2. ***to convey*** knowledge on epidemiology,
3.3. ***to convey*** knowledge on frequently encountered clinical complaints, symptoms, signs and findings,
3.4. ***to convey*** necessary knowledge on health care processes, clinical decision making process, clinical decisions and clinical practices, with performance measures, for managing at the level of 7primary health care service,
4. ***to convey*** knowledge on pharmacology of drugs that are effective at multi-system level, specifically on a body system or on clinical conditions involving a specific body system,
5. ***to convey*** knowledge on phytotherapeutic agents that are effective at multi-system level, specifically on a body system or on clinical conditions involving a specific body system,
6. ***to convey*** knowledge on biostatistical analysis,
7. ***to convey*** basic legal and ethical principles that should be followed in practice of medical profession,

LEARNING OBJECTIVES

At the end of this phase, student should be able to:

1.0. ***recall*** anatomy, histology and physiology of body systems.
2.0. ***list*** necessities for prevention of clinical conditions' emergence, protection and improvement of health in healthy conditions in relation to body systems.
3.0. ***explain*** risk factors and etiopathogenesis, at multi-system level or related to a body system, of clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency.
4.0. at cellular or tissue level,
4.1. ***recognize*** morphological characteristics,
4.2. ***show*** basic pathological changes that occur in clinical conditions.
5.0. at multi-system level or related to a body system, of clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency;
5.1. ***explain*** mechanisms of destruction at molecule, cell, tisssue, organ, system, multi-system and organismal level,
5.2. ***describe*** structural and functional changes caused,
5.3. ***list*** clinical courses in time.
6.0. ***explain*** mechanisms of emergence for frequently encountered;
6.1. clinical complaints,
6.2. symptoms,
6.3. signs,
6.4. laboratory and imaging findings
of clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency.
7.0. at multi-system level or related to a body system,
• for healthy conditions in an individual or community with a request, or
• in an individual with clinical complaint, symptom, sign or laboratory/imaging finding or in a community,
• for clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency,
explain in an evidence-based manner and with performance measures from the aspects of reliability, practicality and outcomes,
• health care processes,
• acquisition of subjective or objective data, information and knowledge required for clinical decision making,
• clinical decision making process,
• clinical decisions and
• clinical practices
which are required for management at primary health care service level.

7.1. evaluation of emergency case (*sepsis and septic shock, dyspnea, acute abdominal pain, urological emergencies, neurological emergencies, trauma*)
7.2. approach to healthy individual or patient (*fever, cardiovascular disease, chest pain, cough and hemoptysis, dyspnea, anemia, lymphadenopathy, diarrhea, pregnancy, urinary tract infection, neurological symptoms, headache, depression, dementia, musculoskeletal dysfunction*)
7.3. laboratory and imaging tests/examinations
7.3.1. based on laboratory disciplines/subdisciplines;
1. medical biochemistry tests:
i. *(venous blood collection*)
ii. *(thyroid function tests, diabetes tests)*
2. medical microbiology tests:
i. *(urine sample collection, throat swab specimen, sputum sample collection, urethral-vaginal-cervical discharge/swab specimen, fecal specimen collection, wound sample collection-,blood collection for culture*)
ii. *(urine strip/dipstick test, urine culture, rapid screening (antigen/antibody) tests, throat culture, sputum culture, urethral-vaginal-cervical discharge culture, fecal culture, wound culture, blood culture)*
3. medical pathology tests:
i. *(Pap smear collection)*
ii. *(Pap smear)*

4. other laboratory tests:
i. *(peripheral/venous blood collection for hematology tests, blood sample collection for therapeutic drug monitoring)*
ii. *(pulmonary function tests, hematology tests for anemia, monitarization of drug therapy)*

7.3.2. imaging tests/examinations based on disciplines/subdisciplines:
1. radiological examinations: *(radiological examinations in gynecology, breast imaging, uroradiology, conventional neuroradiological examinations, spinal neuroradiology, cranial CT, cranial MRI, radiological imaging of musculoskeletal system, radiological examinations in benign ve malign tumors of bones)*
2. nuclear medicine examinations: *(nuclear medicine tests in infectious diseases, radionuclide ventriculography, myocardial scintigraphy, cardiac PET, ventilation/perfusion scintigraphyi, PET in lung cancer, nuclear medicine tests in hematology, scintigraphy of liver/spleen, PET in gastrointestinal system tumors, radioisotope imaging of thyroid and parathyroid, renal scintigrahy (GFR, ERPF, Renogram), brain perfusion scintigraphy, brain PET, bone scintigraphy)*

7.3.3. point of care testing
a. based on laboratory disciplines/subdisciplines;
1. medical biochemistry tests: *(diabetes tests, cardiac markers-, coagulation tests-, blood gases).*
2. medical microbiology tests: *(urine strip/dipstick test, rapid screening (antigen/antibody tests)*
3. other laboratory testsi: *(hematology-peripheral blood smear examination, hematology-complete blood count)*

7.5. making preliminary diagnosis or definitive diagnosis decision
7.6. making non-intervention or intervention decision
7.7. referral/transport of healthy individual or patient

DESCRIPTION of INTRODUCTION to CLINICAL PRACTICE I, II and III (ICP-I,-II,-III)

(MED 102, 202, 303)

AIM of ICP PROGRAM

The aim of Introduction to Clinical Practice Program is to equip the students with basic medical skills and attitudes, in areas such as history taking regarding to systems and in general, physical and mental examination in simulated environments in pre-clinical period and to give the students opportunity to develop skills by applying non –invasive or invasive procedures on the mannequins before encountering with real patients.

Description

ICP is a three year longitudinal course that aims to introduce students to the concepts and main elements of medical practice. It will also be an introduction to the medical profession as a whole and will provide a foundation for clinical practice. The course provides knowledge, cognitive and motor skills and experience in fundamental processes and aspects of medical practice. It involves the application of scientific theory, quality assurance and evidence-based best practice protocols.

Credit Facility

This course has 5 ECTS credits for each of the first three years and all of the students are required to pass this course in order to pass the year.

Content of the ICP I-II-III

First year medical students gain knowledge on First Aid approaches, Basic Knowledge on Infection Control and Standard Precautions, develop skills in Basic Life Support, Patient/Casualty Transportation and Bandaging Techniques regarding to First Aid and handwashing, wearing sterile gloves, wearing masks, assessing vital signs. They also acquire basic knowledge on communication and experience patient-doctor encounter with simulated patients (SP's)*.

The second years ICP Program consist of modules like nasogastric intubation; bladder catheterization; intramuscular, subcutaneous, intradermal and intravenous injections; intravenous catheterization as well as intraarterial blood sampling.

In the third year medical students practice with SP's clinical skills like history taking and physical examination focused on body systems and in general and also mental examination. They also gain clinical skills such as suturing techniques and Advanced Cardiac Life Support.

Clinical Skills Laboratory

The Clinical Skills Laboratory is designed for teaching and assessing students at undergraduate level (during the preclinical period from first-year to third year). The lab provides learners with the ideal setting to practice the clinical skills of history taking, physical examination, communication, and gives opportunities to practice invasive and non invasive procedural skills on mannequins.

Each OSCE room is equipped with video cameras and microphones to record the encounter. An observation area at the center of the lab allows faculty and students to observe the encounters live or view digital recordings for subsequent analysis.

***Simulated Patients (SPs)**

The simulated patient encounters fascilitate transfer of the gained theoretical knowledge to practice in simulated environments. SPs are usually, but not necessarily, lay people who are trained to portray a patient with a specific condition in a realistic way, sometimes in a standardized way (where they give a consistent presentation which does not vary from student to student). SPs are used for teaching and assessment of consultation and clinical/physical examination skills, in simulated teaching environments or in situ. (*Cleland JA, Abe K, Rethans JJ. The use of simulated patients in medical education: AMEE*

Guide No 42. Med Teach. 2009 Jun;31(6):477-86. doi: 10.1080/01421590903002821. PMID: 19811162.)

Assessment

The Assessment procedure of ICP is given in the Assessment Table in this booklet.

Rules for Attendance of the Students

Students are grouped into 4 or 5 and group lists are announced to the class and also displayed in the ICP Lab announcement board at the beginning of the year. Any changes to practical groups on a week by week basis, will only be considered in exceptional situations such as a medical one. Any changes must be requested by a petition along with relevant documentation to the deanary. Any change in sessions will only be accepted interchangeably with another student in another group based on availability of work spaces and course coordinator's discretion (based on evidence provided).
Students are required to follow the rules of professional ethics in the laboratory at any time.

Program Evaluation

Each Semester students are required to fill out a feedback form according the ICP Program. When an OSCE is conducted both students and faculty members complete a written evaluation of the event for the improvement of the course and OSCE.

AIM and LEARNING OBJECTIVES of
INTRODUCTION to CLINICAL PRACTICE III (ICP-III) (MED 303)

AIM

The aim of ICP III Program is to equip Phase III students with basic and advanced professional and clinical (interventional or non-interventional) skills necessary for practice of the medical profession.

LEARNING OBJECTIVES

At the end of this phase, student should be able to:

KNOWLEDGE

1. **define** the basic terminology used in general and organ system specific physical examination.
2. **describe** the steps of history taking and physical examination (cardiovascular, pulmonary, ear/nose/throat, gastrointestinal, gynecological, obstetric, breast, neonatal, prepubertal / pubertal, neurological / psychiatric, musculoskeletal)**.**
3. **describe** suture materials and choose the appropriate material**.**

SKILLS

1. **apply** Advanced Cardiac Life Support on an adult mannequin in accordance with the skill procedure**.**
2. **perform** sutures in accordance with the skill procedure**.**
3. **perform** history taking and physical examination (cardiovascular, pulmonary, ear/nose/throat, gastrointestinal, gynecological, obstetric, breast, neonatal, prepubertal / pubertal, neurological / psychiatric, musculoskeletal) on simulated patients or mannequins in accordance with the skill procedure.
4. **explain** the procedure to be carried out to the patient before the intervention**.**

ATTITUDE

1. **value** the importance of informed consent
2. **pay** attention to patient privacy
3. **value** the importance of not exceeding the limits of his/her own competency level.
4. **pay** attention to follow laboratory rules

AIM and LEARNING OBJECTIVES of SCIENTIFIC RESEARCH and PROJECT - III

AIM

The aim of scientific research and project course - III (SRPC – III) is to equip third-year medical students with knowledge and skills in writing a scientific project proposal, and furthermore to equip them with basic knowledge of scientific careers and with skills in preparing CV and cover letter for a scientific career.

ASSESSMENT PROCEDURE:

For the assessments of the medical students for the SRPC-III, it is calculated out of 100 points; 50% will be graded at the end of the first semester on CV and cover letter preparation assessment and 50% will be graded via scientific project proposal at the end of the second semester.
CV and cover letter assessment should be loaded to Moodle program **before 20 January 2023 Friday**. The constraints of the scientific project proposal assignment will be discussed individually during Small Group Study hours, and during the year small group discussion hours on the program will be used to prepare the individual proposals. The project proposal should be loaded into Google Classroom **before 26 May 2023 Friday.**

Scientific Projects course has a 3% contribution to Term Score (TS).

Please note that attending SRPC lecture hours in the program is mandatory. There will be no acceptance of assignments after the pre-scheduled dates.

ASSESSMENT PROCEDURE

The Assessment Procedure of the Phase III covers exams and scores and their abbrevations that shown below.

- Exams:
  - Committee Exam (CE)
  - Mid-term Exam (MTE)
  - Final Exam (FE)
  - Incomplete Exam (ICE)
  - Make-up Exams (MUE)
- Scores*:
  - Committee Score (CS)
  - Committees Mean Score (CMS)
  - Introduction to Clinical Practice Score (ICPS)
  - Scientific Research and Project Score (SRPCS)
  - Final Exam Score (FES)
  - Incomplete Exam Score (ICES)
  - Term Score (TS)

* All scores have a range of 0-100 points.

Assessment approaches, assessment methods and assessment tools, that related with the exam and score types, are shown in below table.

Assessment Approaches	Assessment Methods	Question Types / Assessment Tools	Exams	Derived Scores
Knowledge-based Assessment	WE: Written Examination	MCQ: Multiple Choice Questions	CE, MTE, FE, ICE	CS, ICPS, FES, ICES
		EMQ: Extended Matching Questions	CE	CS
		FSAQ: Fill-in-the-Blank Short Answer Questions	MuE	CS
Competency–based Assessment	OSCE: Objective Structured Clinical Examination	OSCE Checklist		ICPS
Performance–based Assessment	PWPE: Project Writing and Presenting Evaluation	PWPE Checklist		SRPCS

Exams Information (MED 302, MED 303)	
CE	For the proportional correspondence of individual learning objectives, please see the committee's assessment matrix table/page.
FE	FE consists of 200 MCQs. For the proportional contribution of each committee, please see the committee's assessment matrix table/page.
ICE	ICE consists of 200 MCQs. For the proportional contribution of each committee, please see the committee's assessment matrix table/page.
MUE_{ICS}	MUE will be held only twice in a term. MUE consists of FSAQs. MUE content will be developed by the coordination committees.

Scores Information (MED 302, MED 303)	
CS	The committee score is based on various question types/numbers and/or assessment tools (MCQ, EMQ, MEQ or Checklists). Please see the committee's assessment matrix table/page for the specifications.
CMS	= Average of CSs
ICPS	= (50% Midterm) + (50% Final)
SRPCS	= Score information is shown in below Scientific Research and Project - III page.
FES	= Final Exam Score
ICES	= Incomplete Exam Score
TS *for students, who are exempted from FE*	= 97% of CMS + 3% of SRPCS
TS *for students, who are not exempted from FE*	= 97% of (60% of CMS + 40% of FES or ICES) + 3% of SRPCS

Pass or Fail Calculations of the Courses
INTRODUCTION to CLINICAL SCIENCES (ICS) III (MED 302)
Pass; *TS ≥ 60* ***Fail;*** *FES* ***< 50*** *(barrier point), ICES* ***< 50*** *(barrier point), or/and TS* ***< 60*** *The student is exempted from FE, if the CMS is ≥ 80 and all CSs are ≥ 60* *The FE and ICE barrier point is not applied to the students whose all CSs are ≥ 60*
INTRODUCTION to CLINICAL PRACTICE (ICP) III (MED 303)
Pass; *ICPS ≥ 60* ***Fail;*** *ICPS* ***< 60***

The Assessment Procedure of the Phase III will be announced and explained in the introductory session at the beginning of the academic year.

Definitions of the Assessment Methods and Question Types

MCQ consist of a question, followed by five plausible alternative responses from which the student has to select the correct one.

EMQ are similar to multiple choice questions but with one key difference, that they test knowledge in a far more applied, in depth, sense. EMQ is based on a single theme, two or more questions and has a long option list.

MEQ is made up of one or more short answer questions. The student is provided with basic science or clinical information and then asked to write brief responses to one or more questions. When a series of questions is presented, additional information about the original problem can be provided at each subsequent step, guiding the students through an analytical process.

FSAQ, Fill-in-the-Blank Short Answer Questions are typically composed of a brief prompt that demands a written answer that varies in length from one or two words to a sentence.

OSCE describes a form of competency-based testing used to measure a student's clinical competence. During an OSCE, students are observed and evaluated as they go through a series of stations in which they interview, examine and treat simulated patients who present with some type of medical problem.

Grades

A letter grade is given to the students as a success grade, from the numerical values of the grades given by the relevant teaching staff for each course they take, taking into account the practice, laboratory and similar studies in the semester and examinations and academic activities.
Grades and Letter grades are shown for MED coded courses* in the following table:

Grades	**Letter Grades**
90-100	AA
80-89	BA
70-79	BB
65-69	CB
60-64	CC
59 or less	FF (Fail in the context of “Pass or Fail Calculations of the Courses” table pp.31)
0	FA (Fail due to nonattendance to the courses)

EXAM RULES

- **Seating-** Students will be seated by the exam observers or proctors. Students are not allowed to change their seats without permission.
- **Electronics** – During examinations or tests, students are prohibited from using electronic devices or any other means of communication and recording that have not been approved beforehand. All electronic devices are prohibited. Anyone who fails to comply with these regulations may be charged with academic fraud.
- **Absence** – No additional time will be given to students who are absent for part of the exam, regardless of the reason for their absence.
- **Scratch Paper** – Students are not allowed to bring scratch paper into the exam room.
- **Meaning of Questions** – Students may not consult the supervisor as to the meaning of any question.
- **Signature** – Students must sign their multiple-choice answer sheets and/or written-answer sheets.

- **Other Activities Requiring Disciplinary Action**-
    - Students must not give or receive asistance of any kind during the exam.
    - Gaining access to exam questions before the exam.
    - Using an unauthorized calculator or other mechanical aid that is not permitted.
    - Looking in the exam book before the signal to begin is given.
    - Marking or otherwise writing on the exam book or answer sheet before the signal to begin is given.
    - Making any changes, additions, deletions or other marking, erasing or writing on the exam book or answer sheet after the time for the exam has expired.
    - Having access to or consulting notes or books during the exam.
    - Looking at or copying from another student's paper.
    - Enabling another student to copy from one's paper.
    - Talking or otherwise communicating with another student during the exam or during the read through period.
    - Disturbing other students during the exam.
    - Consulting other persons or resources outside the exam room during the exam.
    - Copying questions or answers either on paper or with an electronic device to take from the exam room.
    - Taking an exam book or other exam materials from the exam room.
    - Taking an exam in place of another student.
    - Arranging to have another person take an exam for the student.
    - Disobeying to the conduct of supervisor during the exam.
    - Disclosing the contents of an exam to any other person.
    - Failing to remain in the exam room for a given period of time by the supervisors.
    - Failing to follow other exam instructions.

Those students found to have committed academic misconduct will face administrative sanctions imposed by the administration of Yeditepe University Faculty of Medicine according to the disciplinary rules and regulations of the Turkish Higher Education Council (YÖK) for students (published in the Official Journal on August 18th, 2012). The standard administrative sanctions include, the creation of a disciplinary record which will be checked by graduate and professional life, result in grade "F" on the assignment, exams or tests or in the class. Students may face suspension and dismissal from the Yeditepe University **for up to one school year**. In addition, student may lose any academic and non academic scholarships given by the Yeditepe University **for up to four years**. The appropriate sanctions are determined by the Yeditepe University administration according to egregiousness of the Policy violation.

AIM AND LEARNING OBJECTIVES OF FREE ELECTIVE COURSES

Elective courses aim to add complementary educational experiences to the medical school curriculum in order to improve comprehension of biopsychosocial approach of medical students, besides offering an opportunity to extend knowledge of interest in specific domains.
The following courses (2 ECTS credits each) will be offered in Spring semester. Each student has to choose one of these elective courses. The selection and enrollment procedure will be announced by the phase coordinator.

Code	**Subject**		
MED 611	**Medical Anthropology**		
Goals	This course aims to provide, different perspectives of medical issues according to anthropological holistic approach for medical students. To present how social science interprets concepts of health, sickness, illness and disease. To show how culture bound symptoms can vary from culture to culture. To discuss all health problems are universal or cultural and how anthropology describes medical phenomenon by theoretically and methodologically.		
Content	To explain that what is anthropology? What is medical anthropology? What is the relationships between social science and medical? Why we need to be explain some concepts according to perspectives of medical anthropology? The meaning of symptoms: cultural bound symptoms, the personal and social meaning of illness, the stigma and shame of illness, What is the positioning of medical doctors for patients and caregivers; Doctor-Patient relations, patients associations, Biological Citizenship, Medicalized Selves, Biopolitics.		
Course Learning Outcomes	At the end of this course, the student should be able to • emphasize cultural patterns of health, • investigate how human behavior that lives in a society is affected by own cultural health patterns, • discuss case studies about how cultural phenomenon affects human and public health, • understand importance of health that is constructed within culture structure by human society, • examine universal definition of health “state of complete physical, mental and social well-being” culturally, • realize interaction between items of cultural system and health system basically; get into the level of knowledge, skills and attitudes

	Total	1	**100**

Code	**Subject**		
MED 612	**Creative Drama**		
Goals	The aim of this course is the development of independence, creativity, self-control and problem-solving potential and the development of communication skills of medical students by using drama and creativity through improvisation of exercises		
Content	Discovering, learning and teaching approaches that are student-centered in a curiosity focused setting with various cognitive and active learning styles.		
Course Learning Outcomes	At the end of this course, the student should be able to • show drama skills in vocational areas benefiting from access to creativity, collaboration and empathy which are the ways of learning through play and improvisation.		
Assessment		**NUMBER**	**PERCENTAGE**
	Assignments	1	50

Code	Subject		
MED 613	**Medical Humanities**		
Goals	This course aims to offer a wide variety of subjects related with art, history, cultural values, social movements, philosophy and many other areas. Main targets of this course are to improve Professionalism and Communication Skills and to support the students to develop an understanding about human and his interaction with universe.		
Content	Main concepts of professionalism such as altruism, accountability, excellence, duty, honor and integrity, respect for others and communication skills will be covered through the lectures of history of medicine in an anthropological concept, medicine in literature and visual arts, and cinemeducation.		
Course Learning Outcomes	At the end of this course, the student should be able to • gain an understanding of the history of medicine as one of social and cultural transformation in the conception of professionalism, disease and what constitutes illness and health through the centuries, • develop the skills to write an essay using primary source documents in the context of the history of medicine, • gain view of different reflections of medicine in literature and visual arts, • develop a point of view to use literature and visual arts as an imagination instrument of compassion, to tolerate ambiguity, to dwell in paradox, to consider multiple points of view, • develop better observational and interpretive skills, by using the power of visual arts to elicit an emotional response in the observer, • gain understanding about the main values and various dimensions of professionalism. • gain insight about his/her own values and develop humanistic values, • develop a deeper understanding of human being in various contexts, • gain understanding about the various factors which influence health in individual and community level, • gain understanding to use films as a comprehensive guide in medical practice, • reflect through films to improve their cognitive and emotional awareness.		
Assessment		**NUMBER**	**PERCENTAGE**

MED 627	**Presentation of Medicine on Media**
Goals	This course aims to teach deep understanding to approaches & visual methods/tools available as community communication media in conveying medical knowledge. To analyze technical features and to develop an understanding of aesthetics behind. To develop skills in conveying messages presented via media tools.
Content	Sensual and perceptual theories of visual communication. Analysis and reading the meaning of the images presented in the media as a PR tool.
Course Learning Outcomes	At the end of this course, the student should be able to • recognize the meaning of the visual literacy as intellectual property, • describe the physical features of the light and theory of vision, • analyze the images with the help of sensual and perceptual theories such as Gestalt, Constructivism, Semiology and Cognitive Approach, • recognize the differences between advertising, journalism and public relations, • describe the historical and cultural stereotypes used in the media, • interpret images in the media (such as typography, graphic design, infographics, photography, TV, computer, internet) in technical, historical, cultural, ethical and critical aspects.

MED 628	**Healthy Living: The Milestones of the Life for Performance Management**
Goals	This course aims to support fitness practices & dietary habits of healthy life style for medical students. To introduce techniques for reducing stress with healthy living habits. To highlight the importance of superior physical and mental health status for a better job performance.
Content	In the content of this course; understanding physiology of the physical activities, risks and benefits of the regular physical activities, using fitness training as a treatment technique, effects of physical activities to reduce stress, the relation between dietary habits and health will have quite importance.
Course Learning Outcomes	At the end of this course, the student should be able to • explain main exercise physiology, • define main fitness terms, • analyze main risks and benefits of exercising, • relate health and eating habits, • perform main fitness training techniques, • manage the basic exercises necessary for healthy life, • perform physical techniques which are frequently used in stress management, • explain the relationship between health and nutrition, • describe the principles of healthy eating, • recognize exercise as a treatment method for common diseases in the community.

MED 630	**Health Law**
Goals	The aim of the course is that students obtain a legal rationale, take ethical decisions from a legal perspective, act in a respectful way to patients' rights, legal risks and responsibilities.

Content	The basic concepts of law will be introduced with a view towards health law. The legal nature of medical interventions, concepts of malpractice and complication will be explained. The fundamentals and consequences of legal and criminal liability will be emphasized and medical interventions showing ethical, and legal characteristics will be evaluated from a legal point of view.
Course Learning Outcomes	At the end of this course, the student should be able to • analyze legislature and by-laws related to health law, • distinguish branches and consequences of legal responsibility, • in taking decisions about patients, help them to make their own decisions in a proper way by respecting their right to self-determination and their privacy, • take ethical decisions from a perspective of patients' rights and legal responsibility, • identify legal risks in the developing areas of health law.

MED 631	**Creative Drama II**
Goals	This course aims the development of body awareness, improvement of communication skills of students by creating an atmosphere where the students can explore the potential of their emotional intelligence.
Content	In this class, the students will be searching for their abilities for self-representation and being visible in society and going into an active learning process by experiencing image theatre, invisible theatre, newspaper theatre and forum theatre techniques
Course Learning Outcomes	At the end of this course, the student should be able to • build supportive relationships in group by improving personal cooperating skills, • recognize personal awareness, • explain and review the schemes of personal attitude, thought and feeling by playing games and different roles, • improve critical and creative ways of thinking skills, also improve skills for life-long learning which will be useful for professional life as well as personal life, • explore being visible and expressing oneself in front of spectators using games and storytelling techniques.

Assessment

	Total	100
Contribution of Final Examination to Overall Grade		50
Contribution of In-Term Studies to Overall Grade		50
	Total	100

Code	Subject		
MED 632	**Music Appreciation**		
Goals	This course aims to clarify the structures underlying western classical music in order to understand and appreciate it consciously while considering a historical perspective. Furthermore it will enable the student to understand that it is the foundation of every genre (pop, rap, rock etc.) in western music culture.		
Content	The evolution of music starting as of medieval times, the birth of new musical rules and genres in the Renaissance and the Age of Enlightenment which in turn redefines the different usages of music and lies the foundation of modern compositional rules. The reflection of those in music genres of today.		
Course Learning Outcomes	At the end of this course, the student should be able to • define music's founding elements, • explain the structural evolution of music within time, • explain what the brain perceives under different conditions.

Code	Subject		
MED 633	**Communication with Hearing Impaired Patients in Turkish Sign Language**		
Goals	The aim of this course is to convey to the students sign language skills and basic vocabulary in order to enable them to communicate with hearing impaired patients.		
Content	Short history of sign language, basic vocabulary, words, terminology and simple sentence building skills regarding patient doctor interview.		
Course Learning Outcomes	At the end of this course, the student should be able to • tell the history of sign language, • show the basic words in sign language, • conduct patient doctor interview in sign language, • understand the health problem of the hearing impaired patient, • give information about the treatment in sign language, • build sentences using basic vocabulary in sign language, • develop personal characteristics such as compassion, tolerance for diversity and open mindedness, • improve body language, • gain understanding about the various factors which influence health in individual and community level.		
Assessment		**NUMBER**	**PERCENTAGE**
	Midterm	1	40
	Final Examination	1	60

Code	Subject
MED 634	**Case Based Forensic Sciences**
Goals	This course aims to increase the awareness of students about forensic cases by presenting them as real case presentations through forensic sciences, where some of the patients that they will examine routinely in their professional lives are forensic cases.
Content	In each lecture, brief introduction information about one of the basic forensic sciences will be given, and with the help of this forensic science, how the case is elucidated and how the process is managed, will be explained in the lectures.
Course Learning Outcomes	At the end of this course, the student should be able to • give preliminary information about what the forensic sciences are, and their relationship with medicine and each other, • give examples an idea about the types of forensic cases they may encounter in their professional routine, • gain the awareness that every patient that they examine can turn into a forensic case, • explain the liability of healthcare professionals against forensic cases and what kind of problems both patients and healthcare professionals may encounter if they are omitted, • give preliminary information about the management process of the forensic case, • explain the importance of the holistic approach in the management of forensic cases, • explain the importance of professionalization and coordination in forensic science.

MED 635	**Advanced Level Communication with Hearing Impaired Patients in Turkish Sign Language**
Goals	The aim of this course is to teach the students medical vocabulary in sign language and enable them to make connected sentences; to understand the complaints of hearing-impaired patients and to explain the treatment methods to the patients.
Content	Vocabulary related to medical terms; Practices in making connected, long sentences; investigating the complaints of the hearing impaired patient; basic patient doctor interview skills with hearing impaired patient; explaining the treatment to the patient.
Course Learning Outcomes	At the end of this course, the student should be able to • tell the sign language equivalents of health terms, • show the sign language equivalents of the names of the diseases, • investigate the patient's complaint in detail during patient doctor interview using sign language, • understand the details of patient’s complaint in sign language, • explain the treatment for the health problem of hearing impaired patient in more detail, • list the names of the departments at the hospital, • make advanced connected sentences in sign language, • be more beneficial to people with disabilities by bringing their sensitivity to a professional level, • translate the patient's problem in sign language to other doctors, • be equipped professionally when they want to conduct medical studies with hearing impaired participants.

SPECIFIC SESSIONS / PANELS

Introductory Session

Aim of the session:
The session provides basic information about Yeditepe University Faculty of Medicine Undergraduate Medical Education Program (YUFM/UG-ME) and the educational phase relevant to the students. This session orients the students to the program and the phase.

Objectives of the Session:
1. To provide basic information about the YUFM/UG-ME.
2. To provide basic information about the phase.
3. To provide essential information on social programs and facilities.

Rules of the Session:
1. The session will be held in two types, conducted by Phase Coordinator and Committee Coordinator, respectively.
2. The first type will be held once in the first week of the educational phase. The second type will be held at the beginning of each committee.
3. Students should attend the session.

Implementation of the Session:
In the first type, Phase Coordinator will present brief information on the following topics:
- Organizational Chart of Yeditepe University Faculty of Medicine Undergraduate Program (YUFM/UG-ME), Work Descriptions and Introduction of Committees Members,
- Directives on YUFM/UG-ME,
- YUFM/UG-ME Program Outcomes
- Learning Objectives of the Phase
- Academic Program of the Phase
- Teaching and Learning Methods
- Learning Environments and Sources/Resources
- Attendance
- Elective Courses (only in Phase I and Phase II)
- Assessment Procedure
- Grade Point Average, Cumulative Grade Point Average (GPA, cGPA) Calculation
- Pass/Fail Conditions
- Feedback of the Previous Year and Program Improvements
- Social Programs and Facilities

In the second type, Committee Coordinator will present brief information on the following topics:
- Learning Objectives of the Committee
- Academic Program of the Committee
- Teaching and Learning Methods
- Learning Environments and Sources/Resources, References
- Attendance
- Assessment Methods and Question Distribution Table
- Committee Score Calculation Method
- Pass/Fail Conditions
- Feedback of the Previous Year and Program Improvements
- Social Programs and Facilities

Committee Evaluation Session

Aim of the Session:

The aim of the session is to evaluate the committee educational program, with all its components, by the students and the committee coordinators. This session will contribute to the improvement of the educational program in general by giving the opportunity to identify the strengths of the committee educational program and revealing the areas which need improvement.

Objectives of the Program Evaluation Session are to;

- establish a platform for oral feedbacks in addition to the systematically written feedback forms
- give the opportunity to the students and the coordinators to discuss the committee period face to face
- allow the students to review the committee exam questions together with faculty members.

Process:

The total duration of the session is 90 minutes and the session consists of two parts. The first part (30 minutes) is dedicated to oral feedback by the students. All of the oral feedback will be recorded and reported by the committee coordination team. In the second part (60 minutes) committee exam questions will be reviewed and discussed by students and faculty.

Rules of the Committee Evaluation Session:

1. The **Committee Evaluation Session** will be held on the last day of each committee after the committee exam.
2. Students are required to attend the session.
3. The Committee coordinator will lead the session.
4. The faculty members who had contributed questions in the committee exam should attend the session.
5. Students must comply with the feedback rules while giving verbal feedback and all participants shall abide by rules of professional ethics.

Program Improvement Session

Aim:

The aim of this session is sharing the program improvements based on the evaluation of the educational program data, with the students and the faculty members.

Objectives:

1. To share the improvements within educational program with the students and the faculty members.
2. To inform the students and the faculty members about the processes of the program improvement
3. To encourage student participation in the program improvement processes.

Rules:

1. Program improvements session will be implemented once a year. The implementation will be performed at the begining of the spring semester.
2. Students are required to attend the session.
3. The phase coordinator will monitor the session. If necessary the dean, vice deans and heads of the educational boards will attend to the session.
4. All faculty members will be invited to the session.

Implementation:

Before the Session

1. Phase coordinator will report the results of the improvements of the educational program.
2. The program improvements report has three parts. The first part of the report includes improvements that have been completed, and those that are currently in progress. The second part of the report includes, improvements that are planned in medium term, and the third part of the report includes, improvements that are planned in the long term.
3. The program improvements report also includes the program evaluation data (student feedbacks, faculty feedbacks, results of the educational boards meetings etc.) in use of improvements.

During the Session

4. The phase coordinator will present the program improvements report to the students and the faculty members.
5. Students can ask questions about, and discuss, the results of the program improvement.

Process: The total period of session is 30 minutes and has two parts. The first part (15 minutes) covers, presenting of the program improvement report. The second part (15 minutes) covers, students' questions and discussion.

After the Session

6. The program improvement brief will be published on the website of Yeditepe University Faculty of Medicine (http://med.yeditepe.edu.tr).

Multidisciplinary Case Discussion Panel

Aim:
The aim of this instructional method is, to integrate what students learnt during committee, to fit in the clinical context and to promote deep learning.

Objectives:
1. To relate learning objectives of the committee,
2. To relate clinical cases and learning subjects,
3. To explain learning objectives in the resolution of clinical cases,
4. To value the importance of multidisciplinary study in the resolution of clinical cases.

Implementation:

Before the Panel
1. Case/cases that will be discussed in the panel will be chosen by a multidisciplinary team, in compliance with committee learning objectives.
2. The resources to analyze the cases will be specified by multidisciplinary team.
3. Students can get hard copies of the cases and the list of sources from student affairs at the beginning of the committee.
4. Students shall study cases in the context of learning objectives before the panel.
5. Before the panel, students may consult the faculty members for information about cases.

During the Panel
6. Cases will be shared visually with students by the multidisciplinary team.
7. Possible resolution of cases will be shared and discussed with students by the multidisciplinary team.
8. After the resolution of cases, students can ask questions to faculty members about the committee learning objectives in the context of cases.

Process: The total duration of the Panel is 60 minutes and has 2 parts. The first part (40 minutes), covers the presentation of cases, resolution of cases, asking questions to students and discussion as suitable to learning objectives during the resolution by multidisciplinary team. The second part (20 minutes), covers students' questions and discussion.

After the Panel
9. Students may continue reviewing the cases in the context of committee learning objectives.
10. The multidisciplinary team will review the usefulness of cases as a learning tool in the context of committee learning objectives. "The Panel Report" will be written by the multidisciplinary team.

INDEPENDENT LEARNING

Description:
"Independent learning" is a process, a method and a philosophy of education in which a student acquires knowledge by his or her own efforts and develops the ability for inquiry and critical evaluation. It includes freedom of choice in determining one's learning objectives, within the limits of a given project or program and with the aid of a faculty adviser. It requires freedom of process to carry out the objectives, and it places increased educational responsibility on the student for the achieving of objectives and for the value of the goals (1).

Aim:
The aim of this instructional strategy is to develop the students' ability, to learn individually, so they are prepared for the classroom lessons, lectures, laboratory experiences and clinical practices, exams, professional life and have the abilities needed for lifelong learning.

Objectives:
With this instructional strategy, students will develop;

- the skills that will help them to learn independently.
- self-discipline in their work habits.
- their evidence based research skills by using reliable resources.
- their teamwork skills by studying together.
- their clinical skills as self-directed working in the clinical skills laboratory.

Rules:
1. All of the students will define independent learning process according to below algorithm.
2. All of the students will be required to fill out a form, which is a self-assessment form for the independent learning (methodology: timing, sources, strategy, etc.).
3. The students' academic performance and independent learning methodology will be analyzed comparatively, and feed-back on further improvements will be provided.

What a student should do for learning independently?
1. **Analyzing:** First you will need to analyze carefully, what your problems and weaknesses are. For example, if you are studying anatomy, is your weak area broadly upper limb, lower limb, or what?
2. **Addressing:** Once you've decided your specific problems, you can list them. Which one needs to be addressed urgently? Work out your priorities. Whatever your subject area is, don't be afraid to return to the basics if necessary. It may give you more confidence in the long run to ensure you have a proper understanding of basic concepts and techniques.
3. **Accessing:** If you need reliable information, or if you need to read about a subject and put it into context, a textbook may be the best place to start. However, the Internet may be helpful if you need very up-to-date information, specific facts, or an image or video etc. If you need an academic research article, reports or case studies for your topic, then a database (Pubmed etc.) would be the best option.
4. **Timing:** In the weekly syllabus you will see, a specific time called "independent learning hour" for your independent work. In addition to these hours, the students should also have their own time schedule for their study time at home.
5. **Planning:** Your next step will be to work out a realistic study-plan for your work. What goals could you literally set for yourself? Don't make them too ambitious but set minor goals or targets that you know you will be able to achieve without having to spend a very long time working on them. How many hours will you need to achieve them? How will you know when you've achieved them?
6. **Recording:** When you work independently, it's a good idea to keep a written record of the work you've done. This can help with further planning and also give a sense of achievement as well as provide something to include in a progress file. As time goes by you may surprise yourself with what you've been able to achieve. This could motivate you to keep going, as could increase your confidence, and even improve your results
7. **Reflecting:** Reflecting on what you've done can help you decide whether the activity was really effective, whether an alternative approach might be better on another occasion, whether you spent the right amount of time and whether you have achieved the target you'd set yourself.
8. **Improving:** Once you've achieved the target, the process of planning can start again. Your needs and priorities may have changed, so think about them and then set yourself to another target.

COURSE LOCATIONS

COURSE CODES	COURSE NAMES	LOCATIONS
MED 302	INTRODUCTION to CLINICAL SCIENCES	**Lectures/Sessions/Panels:** Room Number: B311, Base Floor, Medical Faculty Block, Yeditepe University Campus. **Microbiology Laboratory:** Room Number: 934, 5th Floor, Medical Faculty Block, Yeditepe University Campus. **Pathology Laboratory:** Room Number: 929-930, 5th Floor, Medical Faculty Block, Yeditepe University Campus.

COMMITTEE I - INFECTIOUS DISEASES & HEMATOPOIETIC SYSTEM
AIMS and LEARNING OBJECTIVES

AIMS

The aim of this committee is to convey fundamental knowledge on the prevention measures, etiology, pathophysiology, clinical symptoms and signs, differential diagnosis and pharmacology of drugs used in infectious and hematological clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency. In addition to infectious and hematological clinical conditions, this committee aims to convey necessary knowledge on ethical problems, biostatistical knowledge required in design of medical research and to convey necessary knowledge on genetic basis of clinical conditions, immune response and phytotherapy.

LEARNING OBJECTIVES OF INFECTIOUS DISEASES

In evidence based manner, and related to conditions which are frequent in community and/or pose high risk for individual or community health, and/or life threatening or constitute an emergency, at the primary health care level; at the end of this committee, the student should be able to:

I1. to recall knowledge on structures of agents that cause infectious clinical conditions
I2. to define pathogenesis of mechanisms of agents that cause infectious clinical conditions
I3. to explain epidemiology of infectious clinical conditions
I4. to explain prevention of infectious clinical conditions, and protection or improvement of health against these conditions,
I5. to explain mechanisms of occurrence for frequently encountered clinical complaints, symptoms, signs and findings in infectious clinical conditions
I6. to explain knowledge together with performance measures on health care processes, clinical decision making process, clinical decisions and clinical practices required for managing infectious clinical conditions,
I7. to explain fundamental knowledge on pharmacology of drugs used in infectious clinical conditions
I8. to define ethical problems encountered in health care service and utilization, and on principles of solutions,
I9. to convey necessary knowledge on genetic basis of clinical conditions,
I10. to define biostatistical knowledge required in design of medical research (research design, planning, medical research)

LEARNING OBJECTIVES OF HEMATOPOIETIC SYSTEM

In evidence based manner, and related to conditions which are frequent in community and/or pose high risk for individual or community health, and/or life threatening or constitute an emergency related to Hematopoietic System, at the primary health care level; at the end of this committee, the student should be able to:

H1. to recall knowledge on histology and physiology of hematopoietic system,
H2. to define etiopathogenesis of clinical conditions
H3. to explain epidemiology of clinical conditions related to hematopoietic system
H4. to explain prevention of clinical conditions, and protection or improvement of health against those clinical conditions related to hematopoietic system,
H5. to explain mechanisms of occurrence for frequently encountered clinical complaints,symptoms, signs and findings in clinical conditions related to hematopoietic system,
H6. to explain together with performance measures on health care processes, clinical decision making process, clinical decisions and clinical practices required for managing clinical conditions related to hematopoietic system,
H7. to convey knowledge on pharmacology of drugs that are effective on hematopoietic system or on clinical conditions involving hematopoietic system,
H8. to define basic knowledge on phytotherapy
H9. to define comparative biostatistical analysis of study groups.

15.00- 15.50	Independent Learning	Independent Learning	Independent Learning	**Lecture** Vancomycin & Other Cell Wall Synthesis Inhibitors E. Genç	**Lecture** Quinolones E. N. Özdamar
16.00- 16.50	Independent Learning	Independent Learning	Independent Learning	Independent Learning	Independent Learning
17.00-17.50	Independent Learning	Independent Learning	Independent Learning	Independent Learning	Independent Learning

IL: Independent Learning, CSL: Clinical Skills Learning, YH: Yeditepe University Hospital. Student groups for laboratory/practice sessions will be announced by coordinators.

COMMITTEE I - INFECTIOUS DISEASES and HEMATOPOIETIC SYSTEM

WEEK II / 12 – 16 Sep 2022

	Monday 12-Sep--2022	Tuesday 13-Sep--2022	Wednesday 14-Sep--2022	Thursday 15-Sep--2022	Friday 16-Sep--2022
09.30- 09.50	**Independent Learning**	**Lecture** Hospital Infection M. Sönmezoğlu	**Independent Learning**	**Microbiology Laboratory** (Antibacterial Susceptibility Testing-I) G. Söyletir **Group A**	**Microbiology Laboratory** (Antibacterial Susceptibility Testing-II) G. Söyletir **Group A**
10.00- 10.50	**Independent Learning**	**Lecture** Febril Neutropenia M. Sönmezoğlu	**Lecture** Planning Medical Studies I Ç. Keleş		**Group B**
11.00- 11.50	**Independent Learning**	**Lecture** Bacterial and Viral Skin & Soft Tissue Infections M. Sönmezoğlu	**Lecture** Planning Medical Studies II Ç. Keleş	**Group B**	**Group C**
12.00- 12.50	**Independent Learning**	**Lecture** Infections in Immuncompromised Host M. Sönmezoğlu	**Lecture** Research Design Ç. Keleş		**Group D**
12.50 - 14.00	**LUNCH BREAK**				
14.00- 14.50	**Lecture** Antimicrobial Agents: Mechanism of Action I G. Söyletir	**Lecture** Antimicrobial Agents: Mechanism of Resistance I G. Söyletir	**Lecture** Case Discussion on Immunity to Infection G. Yanıkkaya Demirel	**Group C**	**Independent Learning**
15.00- 15.50	**Lecture** Antimicrobial Agents: Mechanism of Action II G. Söyletir	**Lecture** Antimicrobial Agents: Mechanism of Resistance II G. Söyletir	**Lecture** Case Discussion on Immunity to Infection G. Yanıkkaya Demirel		**Independent Learning**
16.00- 16.50	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Group D**	**Independent Learning**
17.00-17.50	**Independent Learning**	**Independent Learning**	**Independent Learning**		**Independent Learning**

IL: Independent Learning, CSL: Clinical Skills Learning, YH: Yeditepe University Hospital. Student groups for laboratory/practice sessions will be announced by coordinators.

COMMITTEE I - INFECTIOUS DISEASES and HEMATOPOIETIC SYSTEM
WEEK III / 19-23 Sep 2022

	Monday 19-Sep--2022	Tuesday 20-Sep--2022	Wednesday 21-Sep--2022	Thursday 22-Sep--2022	Friday 23-Sep--2022
09.00- 09.50	**Independent Learning**	**Lecture** Beneficence and Non-Maleficence E. Vatanoğlu Lutz	**Lecture** Occupational Health Hazards I M. Sönmezoğlu	**Independent Learning**	**Lecture** Public Health and Communicable Diseases-I E. Çayir
10.00- 10.50	**Lecture** Hodgkin's Lymphoma E. Hacıhasanoğlu	**Lecture** Transplantation E. Vatanoğlu Lutz	**Lecture** Occupational Health Hazards II M. Sönmezoğlu	**Lecture** Introduction to Anemias in Childhood S. Kemahlı	**Lecture** Public Health and Communicable Diseases-II E. Çayir
11.00- 11.50	**Lecture** Lymphoreactive Disease E. Hacıhasanoğlu	**Lecture** Principles of Autonomy and Informed Consent E. Vatanoğlu Lutz	**Lecture** Vaccines M. Sönmezoğlu	***Lecture*** Introduction to Hemolytic Anemias Thalassemias and Hemoglobinopathies (Sickle Cell Anemia and Others) *S. Kemahlı*	**Lecture** Molecular Basis of Hemoglobinopathies A. Ç. Kuşkucu
12.00- 12.50	**Lecture** Pathology of Spleen E. Hacıhasanoğlu	**Lecture** Justice in Medicine E. Vatanoğlu Lutz	**Lecture** Antimycobacterial Drugs A.C. Andaç	***Lecture*** Hemophilia and other Coagulopathies in Childhood *S. Kemahlı*	**Lecture** Inherited Immune System Disorders A. Ç. Kuşkucu
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**Lecture** Zoonotic Diseases I M. Sönmezoğlu	**Lecture** Phytotherapy I E. Yeşilada	**Lecture** Lenforeticular Infections I M. Sönmezoğlu	**Lecture** Transplantation Immunology G. Yanıkkaya Demirel	**Lecture** Pathology of Myeloproliferative Diseases I E. Hacıhasanoğlu
15.00- 15.50	**Lecture** Zoonotic Diseases II M. Sönmezoğlu	**Lecture** Phytotherapy II E. Yeşilada	**Lecture** Lenforeticular Infections II M. Sönmezoğlu	**Lecture** Transplantation Immunology G. Yanıkkaya Demirel	**Lecture** Pathology of Myeloproliferative Diseases II E. Hacıhasanoğlu
16.00- 16.50	**Lecture** Fungal and Parasitic Skin and Soft Tissue Infections M. Sönmezoğlu	**Lecture** Phytotherapy III E. Yeşilada	**Lecture** Tuberculosis & Other Mycobacterial Infections I M. Sönmezoğlu	**Lecture** Blood Components and Transfusion Indications M. Sönmezoğlu	**Lecture** Pathology of Bone Marrow-1 E. Hacıhasanoğlu
17.00-17.50	**Independent Learning**	**Independent Learning**	**Lecture** Tuberculosis & Other Mycobacterial Infections II M. Sönmezoğlu	**Lecture** Blood Groups M. Sönmezoğlu	**Lecture** Pathology of Bone Marrow-2 E. Hacıhasanoğlu

COMMITTEE I - INFECTIOUS DISEASES and HEMATOPOIETIC SYSTEM
WEEK IV / 26-30 Sep 2022

	Monday 26-Sep--2022	Tuesday 27-Sep--2022	Wednesday 28-Sep--2022	Thursday 29-Sep--2022	Friday 30-Sep--2022
09.00- 09.50	**Case Discussions** Pathology Tissue Response to Infections A. Sav	**ICP** (Ear-Nose-Throat Examination) Z. Alkan / M. İ. Şahin	**Independent Learning**	**Independent Learning**	**Independent Learning**
10.00- 10.50	**Case Discussions** General Rewiev of Pathology of Infections Disease A. Sav	**Group A IL** / **Group B IL** / **Group C Small Group Study** SRPC / **Group D ICP**	**Lecture** Hematostatic Drugs and Hematostatic Blood Products I A. C. Andaç	**ICP** (Ear-Nose-Throat Examination) Z. Alkan / M. İ. Şahin	**ICP** (Ear-Nose-Throat Examination) Z. Alkan / M. İ. Şahin
11.00- 11.50	**Lecture** Macrolides E. N. Özdamar		**Lecture** Hematostatic Drugs and Hematostatic Blood Products II A. C. Andaç	**Group A ICP** / **Group B Small Group Study** SRPC / **Group C IL** / **Group D IL**	**Group A Small Group Study** SRPC / **Group B ICP** / **Group C IL** / **Group D IL**
12.00- 12.50	**Lecture** Antiviral Drugs E. N. Özdamar	**Independent Learning**	**Lecture** Emergency Evaluation of Sepsis and Septic Shock M. F. Çelikmen		
12.50- 14.00	**LUNCH BREAK**				
14.00- 14.50	**ICP** (Ear-Nose-Throat Examination) Z. Alkan / M. İ. Şahin	**Lecture** Antiprotozoal Drugs E. N. Özdamar	**Independent Learning**	**Lecture** Antianemic Drugs A. C. Andaç	**Lecture** Genetics of Oncology I A.Ç. Kuşkucu
15.00- 15.50	**Group A IL** / **Group B IL** / **Group C ICP** / **Group D Small Group Study** SRPC	**Lecture** Immunomodulators A. C. Andaç	**Independent Learning**	**Lecture** Antihelminthic Drugs E. Genç	**Lecture** Genetics of Oncology II A.Ç. Kuşkucu
16.00- 16.50		**Lecture** Approach to the Pediatric Patient with Fever P. Saf	**Independent Learning**	**Lecture** Pathology of Viral Infections I A. Sav	**Lecture** Non/Hodgkin's Lymphoma I E. Hacıhasanoğlu
17.00-17.50	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Lecture** Pathology of Viral Infections II A. Sav	**Lecture** Non/Hodgkin's Lymphoma I E. Hacıhasanoğlu

COMMITTEE I - INFECTIOUS DISEASES and HEMATOPOIETIC SYSTEM
WEEK V / 3-7 Oct 2022

	Monday 3-Oct--2022	Tuesday 4-Oct--2022	Wednesday 5-Oct--2022	Thursday 6-Oct--2022	Friday 7-Oct--2022
09.00- 09.50	**Independent Learning**	**Independent Learning**	**Lecture** Antifungal Drugs E. N. Özdamar	**Lecture** Aminoglycosides E. Genç	**Lecture** Transhumanisms and Ethics E. Vatanoğlu Lutz
10.00- 10.50	**Lecture** Pathology of Mycobacterial Infections A. Sav	**Independent Learning**	**Lecture** Antiseptics and Disinfectants E. N. Özdamar	**Lecture** Sulfonamides, Chloramphenicol & Tetracyclines E. Genç	**Lecture** Ethics of the Future/Future of Ethics E. Vatanoğlu Lutz
11.00- 11.50	**Lecture** Laboratory Diagnosis of Infectious Diseases G. Söyletir	**Lecture** Microbiological approach to respiratory infections G. Söyletir	**Lecture** Prevention and Control of Communicable Diseases I E. Çayir	**Lecture** Pharmacological Basis of Cancer Therapy I A. C. Andaç	**Lecture** Bioethics E. Vatanoğlu Lutz
12.00- 12.50	**Lecture** Laboratory Diagnosis of Infectious Diseases G. Söyletir	**Lecture** Microbiological approach to respiratory infections G. Söyletir	**Lecture** Prevention and Control of Communicable Diseases II E. Çayir	**Lecture** Pharmacological Basis of Cancer Therapy II A. C. Andaç	**Lecture** Responsible Biomedical Research E. Vatanoğlu Lutz
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**Independent Learning**	**Independent Learning**	**Lecture** Microbiological approach to blood stream infections G. Söyletir	**Lecture** Introduction to the Course E. Vatanoğlu Lutz	**Independent Learning**
15.00- 15.50	**Independent Learning**	**Independent Learning**	**Lecture** Microbiological approach to blood stream infections G. Söyletir	**Lecture** Ethics of Publication E. Vatanoğlu Lutz	**Independent Learning**
16.00- 16.50	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Lecture** Physician-Patient Relationship E. Vatanoğlu Lutz	**Independent Learning**
17.00-17.50	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Lecture** Confidentiality and Truthfulness E. Vatanoğlu Lutz	**Independent Learning**

COMMITTEE I - INFECTIOUS DISEASES and HEMATOPOIETIC SYSTEM
WEEK VI / 10-14 Oct 2022

	Monday **10-Oct--2022**	**Tuesday** **11-Oct--2022**	**Wednesday** **12-Oct--2022**	**Thursday** **13-Oct--2022**	**Friday** **14-Oct--2022**
09.00- 09.50	**Lecture** Quantitative and Qualitative Platelet Disorders Hematology Lecturer	**Lecture** Myeloproliferative Diseases Hematology Lecturer	**Lecture** Plasma Cell Dyscrasias Hematology Lecturer	**Independent Learning**	**Lecture** Semiology-I M. Sönmezoğlu
10.00- 10.50	**Lecture** Approach to the Patient with Anemia and Laboratory Tests in Diagnosis with Anemia Hematology Lecturer	**Lecture** Chronic Leukemia Hematology Lecturer	**Lecture** Hypercoagulability Hematology Lecturer	**Independent Learning**	**Lecture** Semiology-IIgün M. Sönmezoğlu
11.00- 11.50	**Lecture** Lymphoma Hematology Lecturer	**Lecture** Aplastic and Hypoplastic Anemias Hematology Lecturer	**Lecture** Immune Acquired Hemolytic Anemias / Non-Immune Acquired Hemolytic Anemias Hematology Lecturer	**Independent Learning**	**Lecture** Parasitic Infections I M. Sönmezoğlu
12.00- 12.50	**Lecture** Acute Leukemias Hematology Lecturer	**Lecture** Nutritional Anemias Hematology Lecturer	**Lecture** Introduction to the Program of Family Medicine G. İzbırak	**Independent Learning**	**Lecture** Parasitic Infections II M. Sönmezoğlu
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**Independent Learning**	**Lecture** Pathophysiology of Hematopoietic System Disorders I M. Kaçar	**Lecture** Immunodeficiencies G. Yanıkkaya Demirel	**Lecture** Introduction to Clinical Oncology I B. B. Öven	**Lecture** How to Write a Project Report? B. Yılmaz / H. Taşyıkan
15.00- 15.50	**Independent Learning**	**Lecture** Pathophysiology of Hematopoietic System Disorders II M. Kaçar	**Lecture** Immunodeficiencies G. Yanıkkaya Demirel	**Lecture** Introduction to Clinical Oncology II B. B. Öven	**Lecture** Scientific Career and Preparation of CV B. Yılmaz / H. Taşyıkan
16.00- 16.50	**Independent Learning**	**Lecture** Pathophysiology of Hematopoietic System Disorders III M. Kaçar	**Lecture** Introduction to Clinical Genetics A. Ç. Kuşkucu	**Lecture** Treatment Approaches of Cancer B. B. Öven	**Independent Learning**
17.00-17.50	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Independent Learning**

COMMITTEE I - INFECTIOUS DISEASES and HEMATOPOIETIC SYSTEM
WEEK VII / 17-21 Oct 2022

	Monday 17-Oct--2022	Tuesday 18-Oct--2022	Wednesday 19-Oct--2022	Thursday 20-Oct--2022	Friday 21-Oct--2022
09.00- 09.50	**Lecture** Epidemiology of Communicable Diseases I H.A.Taşyıkan	**Independent learning**	**Independent Learning**	**Microbiology Laboratory** (Diagnostic Tests for respiratory specimens-I) G. Söyletir **Group A**	**Microbiology Laboratory** (Diagnostic Tests for respiratory specimens-II) G. Söyletir **Group A**
10.00- 10.50	**Lecture** Epidemiology of Communicable Diseases II H.A.Taşyıkan	**Independent learning**	**Independent Learning**		**Group B**
11.00- 11.50	**Lecture** Investigation of a Disease Epidemic I H.A.Taşyıkan	**Independent Learning**	**Multidisciplinary Case Discussion Panel**	**Group B**	**Group C**
12.00- 12.50	**Lecture** Investigation of a Disease Epidemic II H.A.Taşyıkan	**Independent Learning**	**Multidisciplinary Case Discussion Panel**		**Group D**
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Group C**	**Independent Learning**
15.00- 15.50	**Independent Learning**	**Independent Learning**	**Independent Learning**		**Independent Learning**

COMMITTEE II - CARDIOVASCULAR and RESPIRATORY SYSTEMS
AIMS and LEARNING OBJECTIVES

AIMS

The aim of this committee is to convey fundamental knowledge on the prevention measures, etiology, pathophysiology, clinical symptoms and signs, differential diagnosis and pharmacology of drugs used in cardiovascular and respiratory clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency. In addition to cardiovascular and respiratory clinical conditions, this committee aims to convey necessary knowledge on ethical problems, biostatistical knowledge required in the design of medical research and to convey necessary knowledge on genetic basis of clinical conditions, immune response and phytotherapy.

LEARNING OBJECTIVES OF CARDIOVASCULAR SYSTEM

In evidence based manner, and related to conditions which are frequent in community and/or pose high risk for individual or community health, and/or life threatening or constitute an emergency related to cardiovascular system, at the primary health care level; at the end of this committee, the student should be able to:

C1. to recall knowledge on histology and physiology of cardiovascular system,
C2. to define etiopathogenesis of clinical conditions related to cardiovascular system,
C3. to explain epidemiology of clinical conditions related to cardiovascular system,
C4. to explain prevention of clinical conditions, and protection or improvement of health against those clinical conditions related to cardiovascular system,
C5. to explain mechanisms of occurrence for frequently encountered clinical complaints,symptoms, signs and findings in clinical conditions related to cardiovascular system,
C6. to explain together with performance measures on health care processes, clinical decision making process, clinical decisions and clinical practices required for managing clinical conditions related to cardiovascular system,
C7. to convey knowledge on pharmacology of drugs that are effective on cardiovascular system or on clinical conditions involving cardiovascular system,
C8. to define ethical problems encountered in health care service and utilization, and on principles of solutions,
C9. to convey necessary knowledge on genetical basis of clinical conditions,
C10. to explain principles of biostatistical analysis

LEARNING OBJECTIVES OF RESPIRATORY SYSTEM

In evidence based manner, and related to conditions which are frequent in community and/or pose high risk for individual or community health, and/or life threatening or constitute an emergency related to respiratory system, at the primary health care level; at the end of this committee, the student should be able to:

R1. to recall knowledge on histology and physiology of respiratory system,
R2. to define etiopathogenesis of clinical conditions related to respiratory system,
R3. to explain epidemiology of clinical conditions related to respiratory system,
R4. to explain prevention of clinical conditions, and protection or improvement of health against those clinical conditions related to respiratory system,
R5. to explain mechanisms of occurrence for frequently encountered clinical complaints,symptoms, signs and findings in clinical conditions related to respiratory system,
R6. to explain together with performance measures on health care processes, clinical decision making process, clinical decisions and clinical practices required for managing clinical conditions related to respiratory system,
R7. to convey knowledge on pharmacology of drugs that are effective on respiratory system,or on clinical conditions involving respiratory system,

****41** out of 200 FE and ICE MCQs will be from Committee II (Each question is worth **0.5** pts).

COMMITTEE II - CARDIOVASCULAR and RESPIRATORY SYSTEMS
WEEK I / 31 Oct - 4 Nov 2022

	Monday 31-Oct-2022	Tuesday 1-Nov-2022	Wednesday 2-Nov-2022	Thursday 3-Nov-2022	Friday 4-Nov-2022
09.00- 09.50	**Independent Learning**	**Lecture** General Signs and Principal Symptoms in Cardiovascular System Diseases C. Ebren -O. Özveren	Coronary Artery Disease I C. Ebren -M. Değertekin	**ICP-CSL** (Advanced Cardiac Life Support) T. Utku / N. Kızılcık	**Independent Learning**
10.00- 10.50	**Lecture** Hypertension Treatment Guidelines E. N. Özdamar	**Lecture** Examination of the Heart C. Ebren -O. Özveren	**Lecture** Coronary Artery Disease II C. Ebren -M. Değertekin	**Group A** Small Group Study SRPC / **Group B ICP** / **Group C IL** / **Group D IL**	**Independent Learning**
11.00- 11.50	**Lecture** Anti-hypertensive Drugs I E. N. Özdamar	**Lecture** Hypertension M. A. Şimşek	**Lecture** Acetylcholinesterase Inhibitors E. Genç		**Independent Learning**
12.00- 12.50	**Lecture** Anti-hypertensive Drugs II E. N. Özdamar	**Lecture** Pericardial Diseases M. A. Şimşek	**Lecture** Acetylcholine and Directly Acting Parasympathomimetic Drugs E. Genç	**Independent Learning**	**Independent Learning**
12.50 - 14.00	**LUNCH BREAK**				
14.00- 14.50	**Lecture** Pharmacology of ReninAngiotensin System E. N. Özdamar	**Lecture** Pathophysiology of Cardiovascular System Disorders I M. Kaçar	**Lecture** Principals of Statistical Analysis I Ç. Keleş	**Lecture** Parasympatholitic Drugs E. Genç	**ICP-CSL** (Advanced Cardiac Life Support) T. Utku / N. Kızılcık
15.00- 15.50	**Lecture** Pharmacology Case Studies E. N. Özdamar	**Lecture** Pathophysiology of Cardiovascular System Disorders II M. Kaçar	**Lecture** Principals of Statistical Analysis II Ç. Keleş	**Lecture** Sympathomimetic Drugs: Catecholamines & Noncatecholamines E. Genç	**Group A ICP** / **Group B** Small Group Study SRPC / **Group C IL** / **Group D IL**
16.00- 16.50	**Independent Learning**	**Lecture** Pathophysiology of Cardiovascular System Disorders III M. Kaçar	**Lecture** Preparing to Analyse Data Ç. Keleş	**Independent Learning**	
17.00-17.50	**Independent Learning**	**Lecture** Introduction to Autonomic System Pharmacology E. Genç	**Independent Learning**	**Independent Learning**	**Independent Learning**

IL: Independent Learning, CSL: Clinical Skills Learning, YH: Yeditepe University Hospital. Student groups for laboratory/practice sessions will be announced by coordinators.

COMMITTEE II - CARDIOVASCULAR and RESPIRATORY SYSTEMS
WEEK II / 7-11 Nov 2022

	Monday 7-Nov-2022	Tuesday 8-Nov-2022	Wednesday 9-Nov-2022	Thursday 10-Nov-2022	Friday 11-Nov-2022
09.00- 09.50	**Lecture** Myocardium E. Hacıhasanoğlu	**Lecture** Congestive Heart Failure I Ç. Koca-M.A.Şimşek	**Independent Learning**	**Commemoration of Atatürk**	**Lecture** Pathophysiology of Respiratory System Disorders I M. Kaçar
10.00- 10.50	**Lecture** Ischemic Heart Disease I E. Hacıhasanoğlu	**Lecture** Congestive Heart Failure II Ç. Koca-M.A.Şimşek	**Independent Learning**		**Lecture** Pathophysiology of Respiratory System Disorders II M. Kaçar
11.00- 11.50	**Lecture** Ischemic Heart Disease II E. Hacıhasanoğlu	**Lecture** Grown-up Congenital Heart Disease Ç. Koca-M.A.Şimşek	**Lecture** Hypersensitivity reactions G. Yanıkkaya Demirel		**Lecture** Pathophysiology of Respiratory System Disorders III M. Kaçar
12.00- 12.50	**Lecture** Congenital Heart Disease in Pediatrics T. Çoşkun	**Lecture** Adrenergic Receptor Blockers E. Genç	**Lecture** Hypersensitivity reactions G. Yanıkkaya Demirel		**Lecture** Pathophysiology of Respiratory System Disorders IV M. Kaçar
12.50 - 14.00	**LUNCH BREAK**				
14.00- 14.50	**Independent Learning**	**Lecture** History and Symptoms in Pulmonary Diseases S. Akduman	**Lecture** Diagnostic Methods in Pulmonary Medicine S. Akduman	**Commemoration of Atatürk**	**Lecture** Electrocardiography I F. O. Mutluer- T.Aksu
15.00- 15.50	**Independent Learning**	**Lecture** Physical Examination and Signs in Pulmonary Diseases S. Akduman	**Lecture** Clinical Application of Pulmonary Function Tests S. Akduman		**Lecture** Electrocardiography II F.O. Mutluer- T.Aksu
16.00- 16.50	**Lecture** Valvular Heart Diseases A.T. Cabbar	**Lecture** Chronic Obstructive Pulmonary Disease S. Akduman	**Lecture** Bronchial Hyperreactivity and Asthma S. Akduman		**Lecture** Cardiac Arrhythmias F.O. Mutluer- T.Aksu
17.00-17.50	**Lecture** Infective Endocarditis and Acute Rheumatic Fever A.T. Cabbar	**Independent Learning**	**Lecture** Adrenergic Neuron Blockers E. Genç		**Independent Learning**

COMMITTEE II - CARDIOVASCULAR and RESPIRATORY SYSTEMS
WEEK III / 14-18 Nov 2022

	Monday 14-Nov-2022	Tuesday 15-Nov-2022	Wednesday 16-Nov-2022	Thursday 17-Nov-2022	Friday 18-Nov-2022
09.00- 09.50	**Lecture** Tracheobronchitis B. Salepçi	**Lecture** Pulmonary Tuberculosis B. Salepçi	**Independent Learning**	**Lecture** Rheumatic Heart Disease A. Sav	**ICP-CSL** (Advanced Cardiac Life Support) T. Utku / N. Kızılcık
10.00- 10.50	**Lecture** Pneumoniae B. Salepçi	**Lecture** Pulmonary Embolism B. Salepçi	**Independent Learning**	**Lecture** CVS Tumors A. Sav	**Group A IL** / **Group B IL** / **Group C ICP** / **Group D Small Group Study** SRPC
11.00- 11.50	**Lecture** Atherosclerosis & Hypertension I A. Sav	**Lecture** Special Pulmonary Problems B. Salepçi	**Lecture** Diseases of the Nose and Paranasal Sinuses M. İ Şahin	**Lecture** Drugs Used in Cardiac Arrythmias I A. C. Andaç	
12.00- 12.50	**Lecture** Atherosclerosis & Hypertension II A. Sav	**Lecture** Emergency Evaluation of Dyspnea H. Candemir	**Lecture** Nasopharyngeal and Oropharyngeal Diseases M. İ Şahin	**Lecture** Drugs Used in Cardiac Arrythmias II A. C. Andaç	**Independent Learning**
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**Lecture** Congestive Heart Failure F. Özkan	**Lecture** Pulmonary Hypertension B. Salepçi	**Independent Learning**	**Lecture** Laryngeal and Voice Diseases M. İ Şahin	**ICP-CSL** (Advanced Cardiac Life Support) T. Utku / N. Kızılcık
15.00- 15.50	**Lecture** Congestive Heart Failure & Pericardium F. Özkan	**Lecture** Respiratory Failure B. Salepçi	**Independent Learning**	**Lecture** Diseases of the Middle Ear and Eustachian Tube M. İ Şahin	**Group A IL** / **Group B IL** / **Group C Small Group Study** SRPC / **Group D ICP**
16.00- 16.50	**Lecture** Chronic Obstructive Pulmonary Diseases F. Özkan	**Lecture** Congenital Lung Anomalies & Atalectasis F. Özkan	**Independent Learning**	**Lecture** Pulmonary Infections I E. Hacıhasanoğlu	
17.00-17.50	**Lecture** Asthma Bronchiale F. Özkan	**Lecture** Pathology of Upper Respiratory Tract F. Özkan	**Independent Learning**	**Lecture** Pulmonary Infections II E. Hacıhasanoğlu	**Independent Learning**

COMMITTEE II - CARDIOVASCULAR and RESPIRATORY SYSTEMS
WEEK IV / 21-25 Nov 2022

	Monday 21-Nov-2022	Tuesday 22-Nov-2022	Wednesday 23-Nov-2022	Thursday 24-Nov-2022	Friday 25-Nov-2022
09.00- 09.50	**Independent Learning**	**Lecture** Pathology of Endocardium & Heart Valves I A. Sav	**Independent Learning**	**Independent Learning**	**Independent Learning**
10.00- 10.50	**Independent Learning**	**Lecture** Pathology of Endocardium & Heart Valves II A. Sav	**Independent Learning**	**Lecture** Diuretic Agents I A.C. Andaç	**Lecture** Approach to Patient with Chest Pain in Primary Care I G. İzbırak
11.00- 11.50	**Independent Learning**	**Lecture** Tumors of the Respiratory System I A. Sav	**Lecture** Drugs Used in the Treatment of Dyslipidemias I E. N. Özdamar	**Lecture** Diuretic Agents II A.C. Andaç	**Lecture** Approach to Patient with Chest Pain in Primary Care II G. İzbırak
12.00- 12.50	**Independent Learning**	**Lecture** Tumors of the Respiratory System II A. Sav	**Lecture** Drugs Used in the Treatment of Dyslipidemias II E. N. Özdamar	**Lecture** Pathology of Pleural and Mediastinal Diseases A. Sav	**Independent Learning**
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**ICP-CSL** (Examination of Cardiovascular and Respiratory System) O. Özveren/ A. Şimşek/ Ç. Koca/ B. Salepçi / S. Akduman / E. Durmuş	**ICP-CSL** (Examination of Cardiovascular and Respiratory System) O. Özveren/ A. Şimşek/ Ç. Koca/ B. Salepçi / S. Akduman / E. Durmuş	**Lecture** Approach to the Patient with Cough and Heameoptysis in Primary Care Ö. Tanrıöver	**Lecture** Tobacco Control and Chronic Non-Communicable Diseases I E. Çayır	**Pathology Laboratory** (Cardiovascular and Respiratory Systems) F. Özkan / A. Sav **Group B** **Group A IL**
15.00- 15.50	**Group C ICP** **Group D Small Group Study** SRPC **Group A IL** **Group B IL**	**Group C Small Group Study** SRPC **Group D ICP** **Group A IL** **Group B IL**	**Lecture** Approach to the Patient with Dyspnea in Primary Care Ö. Tanrıöver	**Lecture** Tobacco Control and Chronic Non-Communicable Diseases II E. Çayır	**Group B IL** **Group A**
16.00- 16.50			**Lecture** Pediatric Advanced Life Support M. Yazıcıoğlu	**Lecture** Tobacco Control and Chronic Non-Communicable Diseases III E. Çayır	**Independent Learning**
17.00-17.50	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Independent Learning**

COMMITTEE II - CARDIOVASCULAR and RESPIRATORY SYSTEMS
WEEK V / 28 Nov-2 Dec 2022

	Monday 28-Nov-2022	Tuesday 29-Nov-2022	Wednesday 30-Nov-2022	Thursday 1-Dec-2022	Friday 2-Dec-2022
09.00- 09.50	**Independent Learning**	**Lecture** Bloodstream Invasion & Sepsis I M. Sönmezoğlu	**ICP-CSL** (Examination of Cardiovascular and Respiratory System) O.Özveren/ A.Şimşek/ Ç.Koca/ B.Salepçi /S.Akduman/E.Durmuş	**Independent Learning**	**Independent Learning**
10.00- 10.50	**Lecture** Respiratory Muscles and Surgical Anatomy of Thorax S. Ercan	**Lecture** Bloodstream Invasion & Sepsis II M. Sönmezoğlu	**Group C IL** / **Group D IL** / **Group B ICP** / **Group A Small Group Study** SRPC	**Independent Learning**	**Independent Learning**
11.00- 11.50	**Lecture** Surgical Disorders of Mediastinum and the Diaphragm S. Ercan	**Lecture** Cardiac Infections M. Sönmezoğlu		**Independent Learning**	**Independent Learning**
12.00- 12.50	**Lecture** Surgical Treatment of Pulmonary Diseases S. Ercan	**Lecture** Anticoagulant, Antiplatelet & Thrombolytic drugs E. N. Özdamar	**Independent Learning**	**Independent Learning**	**Independent Learning**
12.50- 14.00	**LUNCH BREAK**				
14.00- 14.50	**Independent Learning**	**Lecture** Treatment of Cough & Drugs Used in the Treatment of Common Cold E. N. Özdamar	**Lecture** Pharmacology and Toxicology of Tobacco A.C Andaç	**Independent Learning**	**ICP-CSL** (Examination of Cardiovascular and Respiratory System) O. Özveren/ A. Şimşek/ Ç. Koca/ B.Salepçi / S.Akduman / E.Durmuş
15.00- 15.50	**Independent Learning**	**Lecture** Drugs Used in Congestive Heart Disease I A.C Andaç	**Lecture** Drugs Used in the Treatment of Asthma & Chronic Obstructive Lung Disease A.C Andaç	**Independent Learning**	**Group C IL** / **Group D IL** / **Group B Small Group Study** SRPC / **Group A ICP**
16.00- 16.50	**Independent Learning**	**Lecture** Drugs Used in Congestive Heart Disease II A.C Andaç	**Lecture** Tobacco Control and Chronic Non-Communicable Diseases IV E. Çayir	**Independent Learning**	
17.00-17.50	**Independent Learning**	**Lecture** Drugs Used in the Treatment of Angina Pectoris A.C. Andaç	**Lecture** Epidemiology, Prevention and Control of Chronic Non-Communicable Respiratory Diseases E. Çayir	**Independent Learning**	**Independent Learning**

COMMITTEE II - CARDIOVASCULAR and RESPIRATORY SYSTEMS
WEEK VI / 5-9 Dec 2022

	Monday 5-Dec-2022	Tuesday 6-Dec-2022	Wednesday 7-Dec-2022	Thursday 8-Dec-2022	Friday 9-Dec-2022
09.00- 09.50	**Lecture** Bronchiectasis S. Akduman	**Lecture** Interstitial Lung Diseases B. Salepçi	**Lecture** Upper and Lower Respiratory System Infections I M. Sönmezoğlu	**Lecture** Approach to the Pediatric Patient with Pneumonia P. Saf	**Independent Learning**
10.00- 10.50	**Lecture** Lung Cancer S. Akduman	**Lecture** Sleep Apnea Syndrome B. Salepçi	**Lecture** Upper and Lower Respiratory System Infections II M. Sönmezoğlu	**Lecture** Epidemiology and Prevention of Cardiovascular Diseases I H.A.Taşyıkan	**Independent Learning**
11.00- 11.50	**Lecture** Pleural Diseases S. Akduman	**Multidisciplinary Case Discussion Panel**	**Lecture** Inherited Respiratory System Disorders A. Ç. Kuşkucu	**Lecture** Epidemiology and Prevention of Cardiovascular Diseases II H.A.Taşyıkan	**Independent Learning**
12.00- 12.50	**Lecture** X-Ray Examination of the Lungs F. Çelebi	**Multidisciplinary Case Discussion Panel**	**Lecture** Inherited Cardiovascular Disorders A.Ç. Kuşkucu	**Lecture** Public Health and Chronic Non-Communicable Diseases H.A. Taşyıkan	**Independent Learning**
12.50- 14.00	**LUNCH BREAK**				
14.00- 14.50	**Lecture** Ethical Issues at the Beginning of Life E. Vatanoğlu Lutz	**Lecture** Chronic Restrictive Pulmonary Diseases I A. Sav	**Independent Learning**	**Independent Learning**	**Independent Learning**
15.00- 15.50	**Lecture** Ethical Issues in Paediatrics E. Vatanoğlu Lutz	Chronic Restrictive Pulmonary Diseases II A. Sav	**Independent Learning**	**Independent Learning**	**Independent Learning**
16.00- 16.50	**Lecture** Ethics in Intensive Care E. Vatanoğlu Lutz	**Lecture** Congenital Heart Disease I A. Sav	**INTRODUCTION TO ELECTIVE COURSES** (ONLINE)	**Independent Learning**	**Independent Learning**
17.00-17.50	**Lecture** Ethics in Psychiatry E. Vatanoğlu Lutz	**Lecture** Congenital Heart Disease II A. Sav	**INTRODUCTION TO ELECTIVE COURSES** (ONLINE)	**Independent Learning**	**Independent Learning**

COMMITTEE II - CARDIOVASCULAR and RESPIRATORY SYSTEMS
WEEK VII / 12-16 Dec 2022

	Monday 12-Dec-2022	Tuesday 13-Dec-2022	Wednesday 14-Dec-2022	Thursday 15-Dec-2022	Friday 16-Dec-2022

COMMITTEE III - GASTROINTESTINAL SYSTEM
AIMS and LEARNING OBJECTIVES

AIMS

The aim of this committee is to convey fundamental knowledge on the prevention measures, etiology, pathophysiology, clinical symptoms and signs, differential diagnosis and pharmacology of drugs used in gastrointestinal clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency. In addition to gastrointestinal clinical conditions, this committee aims to convey necessary knowledge on ethical problems, biostatistical knowledge required in design of medical research and to convey necessary knowledge on genetic basis of clinical conditions, immune response and phytotherapy.

LEARNING OBJECTIVES OF GASTROINTESTINAL SYSTEM

In evidence based manner, and related to conditions which are frequent in community and/or pose high risk for individual or community health, and/or lifethreatening or constitute an emergency related to gastrointestinal system, at the primary health care level; at the end of this committee, the student should be able to:

G1. to recall knowledge on histology and physiology of gastrointestinal system,
G2. to define etiopathogenesis of clinical conditions related to gastrointestinal system,
G3. to explain epidemiology of clinical conditions related to gastrointestinal system,
G4. to explain prevention of clinical conditions, and protection or improvement of health against those clinical conditions related to gastrointestinal system,
G5. to explain mechanisms of occurrence for frequently encountered clinical complaints,symptoms, signs and findings in clinical conditions related to gastrointestinal system,
G6. to explain together with performance measures on health care processes, clinical decision making process, clinical decisions and clinical practices required for managing clinical conditions related to gastrointestinal system,
G7. to convey knowledge on pharmacology of drugs that are effective on gastrointestinal system or on clinical conditions involving gastrointestinal system,
G8. to define ethical problems encountered in health care service and utilization, and on principles of solutions,
G9. to convey necessary knowledge on genetical basis of clinical conditions,
G10. to list principles of comparative biostatistical analysis of study groups,
G11. to define basic knowledge on phytotherapy

COMMITTEE III - GASTROINTESTINAL SYSTEM
WEEK I / 19-23 Dec 2022

	Monday 19-Dec-2022	Tuesday 20- Dec -2022	Wednesday 21- Dec -2022	Thursday 22- Dec -2022	Friday 23- Dec -2022
09.00- 09.50	**Lecture** Palliative Care Ethics E. Vatanoğlu Lutz	**Lecture** Ethics of Dealing with Addiction E. Vatanoğlu Lutz	**Lecture** Semiology I M. A. Öztürk	**Lecture** Functional GI Disorders & Irritable Bowel Disease C. Pata	**Independent Learning**
10.00- 10.50	**Lecture** Medical Ethical Decision-Making E. Vatanoğlu Lutz	**Lecture** Ethics of Elective Interventions E. Vatanoğlu Lutz	**Lecture** Semiology II M. A. Öztürk	**Lecture** Cirrhosis and Portal Hypertension C. Pata	**Lecture** Comparing Groups-categorical Data Ç. Keleş
11.00- 11.50	**Lecture** Ethics and the Law E. Vatanoğlu Lutz	**Lecture** The Ethics of Testing and Screening E. Vatanoğlu Lutz	**Lecture** Steatohepatitis M. A. Öztürk	**Lecture** Radiology of Gastrointestinal System A. Görmez	**Lecture** Comparing Groups-countinous Data I Ç. Keleş
12.00- 12.50	**Lecture** Public Health Ethics E. Vatanoğlu Lutz	**Lecture** The Ethics of Dealing with Infectious Diseases E. Vatanoğlu Lutz	**Lecture** Alcoholic Liver Disease M. A. Öztürk	**Lecture** Pathophysiology of Gastrointestinal Disorders I M. Kaçar	**Lecture** Comparing Groups-countinous Data II Ç. Keleş
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**Lecture** The Ethics of Patents on Life E. Vatanoğlu Lutz	**Lecture** Ethical Issues at the End of Life E. Vatanoğlu Lutz	**Lecture** Abdominal Pain M. Ergün	**Lecture** Jaundice M. Ergün	**Lecture** Acute Gastroenteritis M. Sönmezoğlu
15.00- 15.50	**Lecture** Agents used in the Treatment of Peptic Ulcer I E. Genç	**Lecture** Gastrointestinal Bleedings in Children Ş. Karaçay	**Lecture** Disease of the Bile Duct and Gall Bladder M. Ergün	**Lecture** Tumors of Eusophagus, Stomach and Small Intestine M. Ergün	**Lecture** Hepatitis I M. Sönmezoğlu
16.00- 16.50	**Lecture** Agents used in the Treatment of Peptic Ulcer II E. Genç	**Lecture** Approach to the Patient with Abdominal Pain Regarding to Primary Care G. İzbırak	**Lecture** Acute and Chronic Pancreatitis M. Ergün	**Lecture** Pathophysiology of Gastro–intestinal Disorders II M. Kaçar	**Lecture** Hepatitis II M. Sönmezoğlu
17.00-17.50	**Independent Learning**	**Lecture** Approach to the Patient with Abdominal Pain Regarding to Primary Care G. İzbırak	**Independent Learning**	**Lecture** Pathophysiology of Gastro–intestinal Disorders III M. Kaçar	**Lecture** Food Poisoning M. Sönmezoğlu

IL: Independent Learning, CSL: Clinical Skills Learning, YH: Yeditepe University Hospital. Student groups for laboratory/practice sessions will be announced by coordinators.

COMMITTEE III - GASTROINTESTINAL SYSTEM
WEEK II / 26-30 Dec 2022

	Monday 26-Dec-2022	Tuesday 27-Dec-2022	Wednesday 28-Dec-2022	Thursday 29-Dec-2022	Friday 30-Dec-2022
09.00- 09.50	**Lecture** Public Health and Nutrition I E. Çayir	**Lecture** Oral Pathology F. Özkan	**Independent Learning**	**Independent Learning**	**Lecture** Transplantation of liver C. Kayaalp
10.00- 10.50	**Lecture** Public Health and Nutrition II E. Çayir	**Lecture** Pathology of Esophagus I F. Özkan	**Lecture** Gastritis and Helicobacter Pylori C. Pata	**Independent Learning**	**Lecture** Pathology of Liver I E. Hacıhasanoğlu
11.00- 11.50	**Lecture** Acute Liver Failure M. Ergün	**Lecture** Pathology of Esophagus II F. Özkan	**Lecture** Gastroeusophegeal Reflux (GE) and Esophageal Motility Disorder C. Pata	**Lecture** Pathology of Stomach I F. Özkan	**Lecture** Pathology of Liver II E. Hacıhasanoğlu
12.00- 12.50	**Lecture** Autoimmune Hepatitis M. Ergün	**Lecture** Antiemetic Agents A. C. Andaç	**Lecture** Chronic /Viral Hepatitis C. Pata	**Lecture** Pathology of Stomach II F. Özkan	**Lecture** Pathology of Appendix & Peritoneum E. Hacıhasanoğlu
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**Lecture** Wilson Disease and Hemochromatisis M. Ergün	**ICP-CSL** Physical Examination of Gastrointestinal System A. E. Kıvanç **ICP-CSL** History Taking S. Özdemir / G. İzbırak/ Ö. Tanrıöver **Group C ICP**	**Lecture** Phytotherapy-IV E. Yeşilada	**Lecture** Toxic Hepatitis M. Ergün	**Independent Learning**
15.00- 15.50	**Lecture** Mass Lesions of the Liver M. Ergün	**Group D** **Small Group Study** SRPC **Group C ICP** **Group A IL** **Group B IL**	**Lecture** Phytotherapy-V E. Yeşilada	**Lecture** Tumors of the Bile Ducts and Pancreas M. Ergün	
16.00- 16.50	**Lecture** Epidemiology, Prevention and Control of Obesity H. A. Taşyıkan		**Lecture** Phytotherapy-VI E. Yeşilada	**Lecture** Malabsorbtion M. Ergün	
17.00-17.50	**Independent Learning**	**Independent Learning**	**Independent Learning**	**Lecture** Peptic Ulcer Disease M. Ergün	

COMMITTEE III - GASTROINTESTINAL SYSTEM
WEEK III / 2-6 Jan 2023

	Monday 2-Jan-2023	Tuesday 3-Jan-2023	Wednesday 4-Jan-2023	Thursday 5-Jan-2023	Friday 6-Jan-2023
09.00- 09.50	**Lecture** Pathology of Liver & Biliary System I E. Hacıhasanoğlu	**Lecture** Pathology of Intestinal Diseases I F. Özkan	**Independent Learning**	**ICP-CSL** History Taking S. Özdemir / G. İzbırak/ Ö. Tanrıöver **Group B ICP** **ICP-CSL** Physical Examination of Gastrointestinal System **Group B ICP** A. E. Kıvanç	**ICP-CSL** History Taking S. Özdemir / G. İzbırak/ Ö. Tanrıöver **Group D ICP** **ICP-CSL** Physical Examination of Gastrointestinal System) **Group D ICP** A. E. Kıvanç
10.00- 10.50	**Lecture** Pathology of Liver & Biliary System II E. Hacıhasanoğlu	**Lecture** Pathology of Intestinal Diseases II F. Özkan	**Independent Learning**		
11.00- 11.50	**Lecture** Pathology of Liver & Biliary System III E. Hacıhasanoğlu	**Lecture** Inflammatory Bowel Disease M. Ergün	**Independent Learning**		
12.00- 12.50	**Lecture** Pathology of Liver & Biliary System IV E. Hacıhasanoğlu	**Lecture** Premalignant Lesion of the Colon M. Ergün	**Lecture** Clinical Nutrition M. Uğraş	**Lecture** Approach to the Patient with Diarrhea Regarding to Primary Care Ö. Tanrıöver	**Lecture** Mesenteric Ischemia H.Candemir
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**Pathology Laboratory** (Gastrointestinal System) F. Özkan/ A. Sav **Group B** **Group A IL**	**Multidisciplinary Case Discussion Panel**	**ICP-CSL** History Taking and Physical Examination of Gastrointestinal System A. E. Kıvanç / S. Özdemir / G. İzbırak/ Ö. Tanrıöver	**Lecture** Immunologic Tolerance and Autoimmunity G. Yanıkkaya Demirel	**Lecture** Digestive & Antidiarrheal Drugs E. N. Özdamar
15.00- 15.50	**Group B IL** **Group A**	**Multidisciplinary Case Discussion Panel**	**Group A ICP (Face to face)** **Group B Small Group Study** SRPC **Group C IL** **Group A ICP**	**Lecture** Immunologic Tolerance and Autoimmunity G. Yanıkkaya Demirel	**Independent Learning**
16.00- 16.50	**Independent Learning**	**Lecture** Clinical Approach to the Patient with Acute Abdominal Pain E. G. Gencer		**Lecture** Complex Diseases-Inherited Gastrointestinal System Disorders A.Ç. Kuşkucu	**Independent Learning**
17.00-17.50	**Independent Learning**	**Lecture** Laxatives E. N. Özdamar	**Independent Learning**	**Lecture** Complex Diseases-Inherited Gastrointestinal System Disorders A.Ç. Kuşkucu	**Independent Learning**

COMMITTEE III - GASTROINTESTINAL SYSTEM
WEEK IV / 9-13 Jan 2023

	Monday 9-Jan-2023	Tuesday 10-Jan-2023	Wednesday 11-Jan-2023	Thursday 12-Jan-2023	Friday 13-Jan-2023

COMMITTEE IV - ENDOCRINE, REPRODUCTIVE & URINARY SYSTEMS
AIMS and LEARNING OBJECTIVES

AIMS

The aim of this committee is to convey fundamental knowledge on the prevention measures, etiology, pathophysiology, clinical symptoms and signs, differential diagnosis and pharmacology of drugs used in endocrine, reproductive and urinary clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency. In addition to endocrine, reproductive and urinary clinical conditions, this committee aims to convey necessary knowledge on ethical problems, biostatistical knowledge required in the design of medical research and to convey necessary knowledge on genetic basis of clinical conditions, immune response and phytotherapy.

LEARNING OBJECTIVES OF ENDOCRINE and REPRODUCTIVE SYSTEMS

In evidence based manner, and related to conditions which are frequent in community and/or pose high risk for individual or community health, and/or life threatening or constitute an emergency, at the primary health care level; at the end of this committee, the student should be able to:

E.1. to recall knowledge on anatomy, histology, and physiology of endocrine and reproductive systems,

E.2. to define etiopathogenesis of clinical conditions related to endocrine and reproductive systems,

E.3. to explain epidemiology of clinical conditions related to endocrine and reproductive systems,

E.4. to explain prevention of clinical conditions, and protection or improvement of health against those clinical conditions related to endocrine and reproductive systems,

E.5. to explain mechanisms of occurrence for frequently encountered clinical complaints, symptoms, signs, and findings in clinical conditions related to endocrine and reproductive systems,

E.6. to explain together with performance measures on health care processes, clinical decision making process, clinical decisions and clinical practices required for managing clinical conditions related to endocrine and reproductive systems,

E.7. to convey knowledge on pharmacology of drugs that are effective on endocrine and reproductive systems or on clinical conditions involving endocrine and reproductive systems,

E.8. to convey necessary knowledge on genetic basis of clinical conditions related to endocrine and reproductive systems,

E.9. to define biostatistical analysis of association between variables

E.10. to convey knowledge on phytotherapeutic agents that are effective on endocrine, reproductive, and urinary systems or on clinical conditions involving endocrine, reproductive, and urinary systems,

E.11. to define ethical problems encountered in health care service and utilization, and on principles of solutions,

LEARNING OBJECTIVES OF URINARY SYSTEM

In evidence based manner, and related to conditions which are frequent in community and/or pose high risk for individual or community health, and/or life threatening or constitute an emergency, at the primary health care level; at the end of this committee, the student should be able to:

U.1. to recall knowledge on anatomy, histology, and physiology of urinary system,

U.2. to define etiopathogenesis of clinical conditions related to urinary system,

U.3. to explain epidemiology of clinical conditions related to urinary system,

U.4. to explain prevention of clinical conditions, and protection or improvement of health against those clinical conditions related to urinary system,

U.5. to explain mechanisms of occurrence for frequently encountered clinical complaints, symptoms, signs, and findings in clinical conditions related to urinary system,

U.6. to explain together with performance measures on health care processes, clinical decision making process, clinical decisions and clinical practices required for managing clinical conditions related to urinary system,

U.7. to convey knowledge on pharmacology of drugs that are effective on urinary system or on clinical conditions involving urinary system,

U.8. to convey necessary knowledge on genetic basis of clinical conditions related to urinary system,

CS: Committee Score
FE: Final Exam
ICE: Incomplete Exam; **pts:** Points
****45** out of 200 FE and ICE MCQs will be from Committee IV (Each question is worth **0.5** pts).

COMMITTEE IV – ENDOCRINE, REPRODUCTIVE and URINARY SYSTEM
WEEK I / 16 – 20 Jan 2023

	Monday 16-Jan-2023	Tuesday 17-Jan-2023	Wednesday 18-Jan-2023	Thursday 19-Jan-2023	Friday 20-Jan-2023
09.00- 09.50	**Lecture** Introduction to Endocrinology F. Keleştemur	**Lecture** Pathology of Adrenal Gland I A. Sav	**Lecture** Pathophysiology of Endocrine System Diseases I M. Kaçar	**ICP-CSL** Follow-up of Pregnancy & Stages of Normal Labour & Gynecological Examination, PAP Smear Obtaining M. Yeşiladalı / P.F.Uzuner / M.G.K. Yazıcı	**Lecture** Introduction to Endocrine Pharmacology E. Genç
10.00- 10.50	**Lecture** Introduction to Diabetes Mellitus Ö. Haliloğlu	**Lecture** Pathology of Adrenal Gland II A. Sav	**Lecture** Pathophysiology of Endocrine System Diseases II M. Kaçar	**Group A** **ICP** **Group B** **Small Group Study** SRPC **Group C IL** **Group D IL**	**Lecture** Thyroid and Antithyroid Drugs I E. Genç
11.00- 11.50	**Lecture** Clinical and Laboratory Findings of Diabetes Mellitus Ö. Haliloğlu	**Lecture** Relation Between Two Variables I Ç. Keleş	**Lecture** Pathophysiology of Endocrine System Diseases III M. Kaçar		**Lecture** Thyroid and Antithyroid Drugs II E. Genç
12.00- 12.50	**Lecture** Obesity Ö. Haliloğlu	**Lecture** Relation Between Two Variables II Ç. Keleş	**Lecture** Hypertensive Disorders in Pregnancy E.G. Gencer	**Independent Learning**	**Lecture** Pathology of Pancreas A. Sav
12.50 – 14.00	**LUNCH BREAK**				
14.00- 14.50	**Lecture** Pathology of Endocrine System: Introduction A. Sav	**Lecture** Calcium Metabolism Ö. Haliloğlu	**Lecture** Prenatal Genetic Diagnosis A. Ç. Kuşkucu	**Lecture** Normal Pubertal Development E. Sağsak	**Lecture** Hypoglycemia F. Keleştemur
15.00- 15.50	**Lecture** Pathology of Pituitary Gland I A. Sav	**Lecture** Physical Examination of Newborn Patient M. Berber	**Lecture** Genetic Counseling A. Ç. Kuşkucu	**Lecture** Congenital Adrenal Hyperplasia E. Sağsak	**Lecture** Hypercalcemic Diseases Ö. Haliloğlu
16.00- 16.50	**Lecture** Pathology of Pituitary Gland II A. Sav	**Lecture** Physical Examination of Child Patient M. Berber	**Independent Learning**	**Lecture** Pubertal Disorders E. Sağsak	**Lecture** Pathology of Thyroid & Parathyroid I A. Sav
17.00-17.50	**Lecture** Pathology of Pancreas A. Sav	**Lecture** Imaging of Thyroid Glands E. Yencilek	**Independent Learning**	**Independent Learning**	**Lecture** Pathology of Thyroid & Parathyroid II A. Sav

IL: Independent Learning, CSL: Clinical Skills Learning, YH: Yeditepe University Hospital. Student groups for laboratory/practice sessions will be announced by coordinators.

MIDTERM BREAK
23 JANUARY – 3 FEBRUARY 2023

COMMITTEE IV – ENDOCRINE, REPRODUCTIVE and URINARY SYSTEMS
WEEK II / 6 – 10 Feb 2023

	Monday 6-Feb-2023	Tuesday 7-Feb-2023	Wednesday 8-Feb-2023	Thursday 9-Feb-2023	Friday 10-Feb-2023
09.00- 09.50	**Lecture** Puerperal Infections T. Demirören	**Lecture** Fluid, Electrolyte I G. Kantarcı	**Independent Learning**	**ICP-CSL** Follow-up of Pregnancy & Stages of Normal Labour & Gynecological Examination, PAP Smear Obtaining R M. Yeşiladalı / P.F.Uzuner / M.G.K. Yazıcı	**Lecture** Conditions Affecting Vulva & Vagina O. Ünal
10.00- 10.50	**Lecture** Normal and Abnormal Labor T. Demirören	**Lecture** Fluid, Electrolyte II G. Kantarcı	**Independent Learning**	**Group A** Small Group Study SRPC / **Group B ICP** / **Group C IL** / **Group D IL**	**Lecture** Menopause E. Attar
11.00- 11.50	**Lecture** Insulin and Oral Antidiabetic Drugs I E. Genç	**Lecture** Hyperfunctioning Disorders of Anterior Pituitary Gland F. Keleştemur	**Lecture** The Gynecological History and Examination G. Yıldırım		**Lecture** Fertility Control E. Attar
12.00- 12.50	**Lecture** Insulin and Oral Antidiabetic Drugs II E. Genç	**Lecture** Disorders of Posterior Pituitary Gland F. Keleştemur	**Lecture** Endometriosis & Adenomyosis G. Yıldırım	**Lecture** Congenital Anomalies of The Urinary System Ş. Karaçay	**Lecture** Infertility E. Attar
12.50-14.00	**LUNCH BREAK**				
14.00- 14.50	**Lecture** Pathology of Vulva & Vagina F. Özkan	**Lecture** Hypopituatirism F. Keleştemur	**Lecture** Adrenocortical Hormones and Drugs I E. Genç	**Lecture** Reproductive Ethics E. Vatanoğlu Lutz	**ELECTIVE WEEK I** / **Independent Learning**
15.00- 15.50	**Lecture** Pathology of Treponemal Infections F. Özkan	**Lecture** Diffuse Hormonal Systems and Endocrine Tumor Syndromes Ö. Haliloğlu	**Lecture** Adrenocortical Hormones and Drugs II E. Genç	**Lecture** Gene Ethics E. Vatanoğlu Lutz	
16.00- 16.50	**Lecture** Pathology of Breast I F. Özkan	**Lecture** Thyroid Function Tests Ö. Haliloğlu	**Lecture** Antenatal Care T. Demirören	**Lecture** Breast Diseases A. Akalın	**Independent Learning** / **ELECTIVE WEEK I**
17.00-17.50	**Lecture** Pathology of Breast II F. Özkan	**Lecture** Thyroid Disorders Ö. Haliloğlu	**Lecture** Disorders of Early Pregnancy (Miscarriage; Ectopic; GTD) T. Demirören	**Lecture** Imaging of Urinary System M. Topçuoğlu	

COMMITTEE IV – ENDOCRINE, REPRODUCTIVE and URINARY SYSTEMS
WEEK III / 13 – 17 Feb 2023

	Monday 13-Feb-2023	Tuesday 14-Feb-2023	Wednesday 15-Feb-2023	Thursday 16-Feb-2023	Friday 17-Feb-2023

COMMITTEE V - NERVOUS SYSTEM and PSYCHIATRY
AIMS and LEARNING OBJECTIVES

AIMS

The aim of this committee is to convey fundamental knowledge on the prevention measures, etiology, pathophysiology, clinical symptoms and signs, differential diagnosis and pharmacology of drugs used in nervous and psychiatric clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency. In addition to nervous and psychiatric clinical conditions, this committee aims to convey necessary knowledge on ethical problems, biostatistical knowledge required in the design of medical research and to convey necessary knowledge on the genetic basis of clinical conditions, and immune response.

LEARNING OBJECTIVES OF NERVOUS SYSTEM and PSYCHIATRY

In evidence based manner, and related to conditions which are frequent in community and/or pose high risk for individual or community health, and/or life threatening or constitute an emergency, at the primary health care level; at the end of this committee, the student should be able to:

N1. to recall knowledge on anatomy, histology, and physiology of nervous system,

N2. to define etiopathogenesis of clinical conditions related to nervous system and psychiatry,

N3. to explain epidemiology of clinical conditions related to nervous system and psychiatry,

N4. to explain prevention of clinical conditions, and protection or improvement of health against those clinical conditions related to nervous system and psychiatry,

N5. to explain mechanisms of occurrence for frequently encountered clinical complaints, symptoms, signs, and findings in clinical conditions related to nervous system and psychiatry,

N6. to explain together with performance measures on health care processes, clinical decision making process, clinical decisions and clinical practices required for managing clinical conditions related to nervous system and psychiatry,

N7. to convey knowledge on pharmacology of drugs that are effective on nervous system or on clinical conditions involving nervous system and psychiatry,

N8. to convey necessary knowledge on genetic basis of clinical conditions related to nervous system and psychiatry,

N9. to define design and biostatistical analysis of survival research,

N10. to define ethical problems encountered in health care service and utilization, and on principles of solutions,

COMMITTEE VI - MUSCULOSKELETAL SYSTEM
AIMS and LEARNING OBJECTIVES

AIMS

The aim of this committee is to convey fundamental knowledge on the prevention measures, etiology, pathophysiology, clinical symptoms and signs, differential diagnosis and pharmacology of drugs used in musculoskeletal system clinical conditions which are frequent in community and/or pose high risk for individual or community health, and/or life-threatening or constitute an emergency. In addition to musculoskeletal clinical conditions, this committee aims to convey necessary knowledge on biostatistical knowledge required in the design of medical research and to convey necessary knowledge on genetic basis of clinical conditions and immune response.

LEARNING OBJECTIVES OF MUSCULOSKELETAL SYSTEM

In evidence based manner, and related to conditions which are frequent in community and/or pose high risk for individual or community health, and/or lifethreatening or constitute an emergency, at the primary health care level; at the end of this committee, the student should be able to:

1. to recall knowledge on histology and physiology of musculoskeletal system,

2. to define etiopathogenesis of clinical conditions related to musculoskeletal system

3. to explain epidemiology of clinical conditions related to musculoskeletal system

4. to explain prevention of clinical conditions, and protection or improvement of health against those clinical conditions related to musculoskeletal system,

5. to explain mechanisms of occurrence for frequently encountered clinical complaints,symptoms, signs and findings in clinical conditions related to musculoskeletal system,

6. to explain together with performance measures on health care processes, clinical decision making process, clinical decisions and clinical practices required for managing clinical conditions related to musculoskeletal system,

7. to convey knowledge on pharmacology of drugs that are effective on hematopoietic system or on

clinical conditions involving musculoskeletal system,

8. to convey necessary knowledge on genetic basis of clinical conditions,

9. to explain principles of random sampling, confidence interval, and power analysis

26.May.23	10.00-12.50	**CSL Group B (Physical examination of the musculoskeletal system)**	G.Meriç / B.Ç. Aksu / K. Başdelioğlu
FRIDAY	14:00-16:50	**CSL Group C (Physical examination of the musculoskeletal system)**	G.Meriç / B.Ç. Aksu / K. Başdelioğlu

Beginning of ICP - III Sept 26, 2022 Monday
End of ICP - III May 26, 2023 Friday
Midterm Exam March 29,30,31, 2023 Wednesday – Friday
Make-up Exam May 24, 2023 Wednesday
Final Exam June 12-14, 2023 Monday - Wednesday
Incomplete Exam July 26, 2023 Wednesday

* They are relevant but not included in the ICP III PROGRAM

STUDENT COUNSELING

Student counseling is a structured development process established between the student and the consultant that aims to maximize student success by focusing the student to her/his target. Although the major component of this relationship is the student, the faculties also take part by bringing the requirements of this interaction to their systems. The targeted outcomes of the consultant-student interaction are success in the exams, success in the program, and preparation for professional life.
The aim of counseling is to help students to solve their problems, to give professional guidance, to provide coaching, to contribute to adopting the habit of lifelong learning, to provide information about the University and Faculty, to follow their success and failure and to help them select courses.
The consultants selected among Basic Medical Sciences instructors for the first three years transfer the students to Clinical Sciences instructors for the following three years.

The topics that will be addressed by the consultants are as follows:

a. Inform students about the university, faculty and surrounding facilities
b. Inform students about the courses and help them select courses
c. Inform students about the education and assessment regulations
d. Follow students attendance to lectures and success
e. In case of failure, investigate the causes and cooperate with the students to overcome them
f. Help students in career planning
g. Contribute to students adapting the habit of lifelong learning
h. Guide students to counseling services of the university
i. Set a role model as long as the professional susceptibility, professional guidance, intellectual responsibility, interaction with peers, ethics, professional values are concerned
j. Contribute to cultivation of professional and intellectual development in a rapidly changing world
k. Inform the coordinator when there are unsolved problems of the students

Consultant-student relationship is a dynamic and mutual process carried out within the campus and the hospital. It is recommended that the consultant and the student meet at least twice during a semester.

The expectations from the student are as follows:

a) Contribute to improvement of satisfaction level in the problem areas
b) Report the social and economic conditions that require consultant's help
c) Specify expectations from the education and the department from which this training is taken
d) Give feedback on the counseling services regarding their satisfaction level

Student counsellors will be appointed after finalization of the class list and will be announced to the students.
After the announcement of the counsellors on the information board, each student is expected to contact his/her counsellor until the end of the current committee.

LIST OF STUDENT COUNSELING - PHASE III

	STUDENT			COUNSELOR
	STUDENT NO	**NAME**	**SURNAME**	**NAME**
1	20200800146	FARSIMA	ABDIPOUR VOSTA
